

Tiki is a multilingual, feature-rich all-in-one content management system (CMS) with a tightly integrated set of comprehensive groupware features. Tiki is free and open source software, published under the LGPL licence. Tiki is actively managed and developed by a large committed community.

Different than other solutions, Tiki is not dependant on external extensions. **Tiki "does it all"**. Based on a sophisticated Wiki Syntax, available in all features like wiki (pages), articles, blog, forum, messages, trackers, newsletters, calendars etc., it is quite easy to create all types of collaborative or publishing applications: website, portal, intranet, knowledge base, data management, conference registration, newsletter and so on.

Tiki is a content management framework (CMF) that can be configured differently to provide many innovative solutions. It is easy to get started using configuration profiles, user and admin wizards. It is backed up by a helpful community via forums, developer and user mailing lists and the IRC channel #tikiwiki on freenode.net.

Features

- Wiki, Articles (for ex.: news), Blogs, Forums
- Calendars, Newsletters, File Galleries
- Trackers - forms and data manipulation (for ex.: issue or bug tracking system)
- User messaging, webmail
- Banners, Spreadsheets, Surveys, Quizzes, Polls
- Designer friendly Bootstrap-based themes
- Customizable menus, navigation and layout
- Advanced user and group management
- Content and permissions control based on objects, categories and groups
- External authentication support (for ex.: LDAP, LinkedIn and more)
- Connectors to external applications (for ex.: BigBlueButton, Kaltura, Twitter, Facebook)
- Advanced Search (using MySQL Full Text Search, ElasticSearch)
- RSS generation and syndication
- Rich Text WYSIWYG Editing (CK Editor), sophisticated Wiki Syntax extensible using Wiki Plugins
- Global content categorization and tagging

Configuration Profiles

Tiki configuration profiles provide a quick way to start off from a fully configured state or to instantly install new functionality. You can also take snapshots of your favourite configurations for reuse. You can even setup your own profile repository.

- News Website
- Corporate wiki / Intranet / Extranet / Portal
- Application Forms / Event Registration
- Project management
- Knowledge Base / Bug Tracker / Glossary
- Workflow and specialized web applications
- and many more...

New profiles are continually added in an open, collaborative way. To learn more about Tiki profiles, visit <http://profiles.tiki.org>

Technology

Tiki uses industry standard and readily available web technologies. This allows you to run it on most web hosting providers as well as install it using one-click installers. It uses the following well-known components:

- Responsive Design/ Bootstrap Framework
- Zend Framework
- PHP / MySQL / Smarty
- jQuery

Timeline

Since its initial release in 2002, Tiki has seen substantial growth with more than a million downloads and countless more installations through one-click hosts.

With more than 300 contributors having worked on the project, Tiki is one of the most diverse and active open source communities in the world.

To keep up-to-date with the latest technology, the Tiki Community releases new versions regularly, early and often. A Long Term Support (LTS) version is also provided for users that wish to upgrade less frequently.

Numbers

12 + years old

40 + languages

300 + code contributors (via CVS/SVN)

1,000 + built-in features and preferences

1,500 + wiki pages of documentation

1,000,000 + downloads

2,000,000 + lines of code, with a code commit every two hours on average

Tiki Users

- **Governments**
- **Enterprises**
- **Small Businesses**
- **NGOs / Non-profits**
- **Communities**
- **Service Providers**
- **Academic / Educational Institutions**

FAQs

Q Where can I download Tiki?

A <http://tiki.org/Download>

Q Can I test Tiki without installing it on my server?

A Yes! Visit <http://tiki.org/Demo> to access test installations and “test drive” Tiki. You can log in as an administrator and get a feel for how Tiki works.

Q Where can I see how far I can go with Tiki?

A You can review the guides (<http://doc.tiki.org>), watch the videos (<http://tiki.org/TikiMovies>) and view some Featured Tiki sites (<http://tiki.org/Featured+Tikis>).

Q How can I get involved in the Tiki community?

A First, use and enjoy the software. Then begin contributing any way you like: answering fellow users' questions or suggesting ideas, translating interface text, updating documentation, or coding new features. We are a very open and friendly community. <http://tiki.org/Join>

Q Is this really free?

A Yes, it's free source software, licensed under LGPL.

Q Who owns / manages Tiki?

A It's a community-managed project, administered by the non-profit Tiki Software Community Association. You can help!

Q How can I find out more?

A Visit <http://tiki.org> to find links to the documentation, a directory of consultants, hosting options, as well as support forums, email lists, live chat to ask questions and obtain more information.
