- SWOT

The usual way to make a change is to do it. Tiki is a do-o-cracy.

- Join one of the Teams
- You want to change content on wiki pages, do it.
- You don't have access? ask for it http://irc.tiki.org
- You want to fix something in the code? Please go right ahead: How to get commit access

If you want to change a procedure, a way of coding, a way to make decisions, etc. Find the relevant wiki page, and edit it. If it doesn't exist, create it.

Once you are ready with your proposal, please contact the developers mailing list, which is the closest we have to a decision-making body.
