NonStrictHierarchicalNameSpaces

How to form namespaces for Wiki Pages?

Some thoughts on whether to make wiki namespaces strictly hierarchic or not. Maybe at some point in time the question will come up, so we might as well look a little closer now, before deciding what direction to go.

Do you think "non-strict" would be possible and reasonable to establish?

Strict Hierarchies

Wikis are non-strict by nature

Proposal for non-strict namespaces

Realistic Proposal
