Fixing Community Items session

Prior the Roundtable time we organize a 30mn session to fix a list of bugs from the reports at https://dev.tiki.org/Community+items#Summary and https://dev.tiki.org/Community+items#List

I’ll organise a list and submit it on the fix session

- I could fix the ImgPlugin finally ;)
  - Fixed in item5990
Volunteers needed for...

- Update and maintain Featured Tikis (and merge/remove Showcase)
  - I’ll do the tracker and check it is included in the blue Tiki.o
  - I take it (design the page with fluid display for the tracker items - plugin List)
- Validate (and apologize to) unvalidated users (still 340+ of them - needs to be user admin)
- Take ownership of tracker24 requests from Contact Us and possible ContactUs Doc (obsolete)
- Any more?

Topics

1st hour quick news

1. Tiki17 release process (branching) ?
2. Brief about Commit+Guidelines addition to Commit Code.
   - To be merged in DevTips
   - More details about commit tags and message should be added at DevTips
3. How to deal with Forum spammers (they fill in all anti-bot answers correctly to register manually it seems)
4. CSS color highlighting of "Sister wiki" links on doc.t.o by URL - if liked we should have it on all tiki.org sites
5. Any chance of support in wiki parser for Markdown? Maybe just a quick question and response more than discussion topic, but a Tiki site admin had this question.
   - Could it be a wiki-plugin? I had that in my mind for some time already to create PluginBBSyntax, PluginMarkDown or PluginWikiPedia to parse these syntaxes... —
   - Not better to add it as alternative editor like WYSIWYG / WikiSyntax / Markdown? I assume that WikiSyntax and Markdown should be quite easily translated towards each other ... problem when the number of formatting options are not the same. what you think?

Second hour, longer topics

1. Endangered feature progress and next course of action
