What

See Roundtable Meetings for a detailed description.

Fixing Community Items session

*(Why this?)*

Prior the Roundtable time we organize a 30mn session to fix a list of bugs from the reports at [https://dev.tiki.org/Community+items#Summary](https://dev.tiki.org/Community+items#Summary) and [https://dev.tiki.org/Community+items#List](https://dev.tiki.org/Community+items#List)

... Tiki community issues (no coding) where volunteers are needed

... 

Where

http://live.tiki.org

Topics

1st hour quick news

1. Tiki 17 Release process status
2. Adding a feed for Tiki improvement, evolution
   From discussion in the devlist (The good news are hard to find sometimes...):
   Something like a blog+rss+... feed to people know when they need to update their tiki cause an awaited feature just dropped in.
3. Site/browser title logic / wording - follow from discussion in the devlist (Tiki-devel Site/browser title settings (was RE: Title site setting, logic or... ?))
   At tiki-admin.php?page=general, Site identity we can set the Title of the website (Browser title)
   Tiki is also able to display the "location" (page viewed) associated with the browser title.
   But instead of having the "location" as an option it is ALWAYS displayed while the Browser title can be remove from the title.
   It should be the other way around, meaning that location should be optional.
   1. This setting is "Advanced" (not displayed by default on fresh install) and set to "Before". Default should be set to none so newcomer are not confused by a "forced" option that they can’t see until they level up. 

4. Mini Chat (XMPP) demo by Fabio
5. TV.t.o retiring

Second hour, longer topics
1. Spam, spam, spam ...
2. ...
