Topics

1st hour quick news

1. Status of the Tiki 19 development in trunk
   - "Warning: The lock file is not up to date with the latest changes in composer.json. You may be
getting outdated dependencies."

- New Requirements - "Your requirements could not be resolved to an installable set of packages." because zendframework/zend-ldap 2.10.0 requires ext-ldap PHP extension

2. Are we going to have 18.2 LTS release soon?
3. Some sites moved to new server - Is everything running smoothly?
   - e.g. nextdev.tiki.org is stuck on installation screen since yesterday (Problem detected at 2018-07-18 13:27:52 CEST (2018-07-18 11:27:52 UTC).)
4. Short report about new Tiki community members (someone from Australia) ;)

(add yours above)

Second hour, longer topics

1. Should we integrate reCAPTCHA v3 for Tiki 19.x already? (it is beta now)
2. What do you think about adding an option to FileGalleries to edit images in various bitmap/vector formats using Photopea web app (in-browser editor) API?
3. Do we have any users in Australia? What if someone went there to promote Tiki’s H5P integration on the H5P conference 2018 in December?
4. Related to Tiki 19 development:
   - Small demo (at http://zukakakina.com/TrunkTest/tiki-index.php) of Smartmenus (https://www.smartmenus.org/blog/categories/bootstrap-4/) implementation in Tiki, related to consolidation of Bootstrap and Suckerfish menu types
   - Proposal: consolidate FiveAlive themes
   - Proposal: consolidate layout templates into three - "Basic", "Classic", "Social" (fixed top bar).
5. Retire the tikiwiki-artwork mailing list to be read only for archival purposes or keep it open? (last message there is test from Gary in 2016)

(add yours above with sign)

luciash d' being (luci):
i do not even almost have any idea what CRM should be

luciash d' being (luci):

Bernard Sfez / Tiki Specialist (Bsfez):
I have its answer !!! and I raised my hand :0

Bernard Sfez / Tiki Specialist (Bsfez):
Hi Bernard,It has taken much longer than I anticipated to pack and move from London to Lithuania. It is not so easy after 20 years... It has been very frantic 4 weeks. But it is happening.Progress with auth was good but not as good as I expected with hybridauth... It appears drupal and others also dropped hybridauth in favour of https://github.com/thephpleague/oauth2-client I have also done twitter auth on http://atlantida-lt.eu/kstrans/ but with https://github.com/abraham/twitteroauth I am about
to leave London. And I hope just in a few hours..Regards, Aris

luciash d' being (luci):
so it seems he does not recommend hybridauth anymore...

Marc Laporte (marclaporte):
October, June, February, October, etc.

Bernard Sfez / Tiki Specialist (Bsfez):

Roberto Kirschbaum (robertokir):
Agree 100% Marc, this is what Luis and I noticed - release should take 1/2 hour but it's not just release!

Bernard Sfez / Tiki Specialist (Bsfez):
RequirementsThe script requires and fully supports jQuery 1.7.0+.

Bernard Sfez / Tiki Specialist (Bsfez):
(Smartmenus requirements)
Jean-Marc Libs (Jyhem):
structures !!!

Roberto Kirschbaum (robertokir):
+1 Luci, there are use cases that need multilevel

Bernard Sfez / Tiki Specialist (Bsfez):
And then people updating will need to convert their previous suckerfish menu to
smartmenus or the update will do it ?

Bernard Sfez / Tiki Specialist (Bsfez):
Smartmenus is nice for sure; Using the script with RTL text (e.g. Hebrew, Arabic)
To use the script with right-to-left text you just need to set the sm-rtl class to the root
element:

Bernard Sfez / Tiki Specialist (Bsfez):
Your mic gain is WAY to high JM ;)

Bernard Sfez / Tiki Specialist (Bsfez):
Sorry if I missed it. what is the bottom line for Smatrmenus ?

Bernard Sfez / Tiki Specialist (Bsfez):
We add it ?

luciash d' being (luci):
