Topics

First hour, quick news

1. 5 minutes of wishes, congratulations, resolutions talk and dreams about 2020.
2. Planning Branching
   (Fri. Jan. 24th) Let's hope there are no blockers!
   Team assembly
   Quick review of blockers and critical (as long as first hour stays empty)
   **New branch needs a star codename!** Ideas?
3. Slider and image height on Doc need a quick fix. Try to read:
   https://doc.tiki.org/PluginList-output-control-block#Report_Formatting
4. New Tiki project for 2020 (service) announcement by luci!
5. TRMs at different days and times? (many people can only do weekends, for instance, we should try a couple on 2020 imho)

*No more room for topics this month*

*put your topic (max. 5-10 minutes) into the list above*

Second hour, longer topics

1. Why can’t we move to Git right after 21.0 release?
2. Test Unit and Tiki
3. Tiki is PWA (https://doc.tiki.org/Progressive-Web-App)
4. Marketing: If Daniel doesn’t get the time wrong, he want to offer to do a podcast via his telephone conference system.
Dear Daniel, some may have concerns about this and we won't have much time to add another topic. I suggest you ask first and we discuss this elsewhere (the devlist ?)

- Agreed, it is cancelled. **That makes total sense**, tks for the feedback.
  
  This Roundtable is mostly a Dev meeting. Perhaps there should be a marketing meeting or like you suggest, let's do a marketing get together. Tks.

5. **Tracker Rules** (with vue.js) quick demo (added in real time during the meeting)

Bernard Sfez / Tiki Specialist (Bsfez): ?
Guill (guillaume.leclerc): +1
Gour (gour):@gary ok, got it
Gary Cunningham-Lee (chibaguy):We should discuss on the lists, to get more input.

Bernard Sfez / Tiki Specialist (Bsfez):lower your gain
Bernard Sfez / Tiki Specialist (Bsfez):(master sounds evil...)
Gary Cunningham-Lee (chibaguy):/me likes svn but will adapt ;-)

Jonny Bradley (jonnybradley):yes gour, it's currently broken again
Guill (guillaume.leclerc):always broke after a while
Gour (gour):ok
Guill (guillaume.leclerc):you mean for your own fork right?
Gour (gour):yep
Guill (guillaume.leclerc):automatic mirror from upstream?
Guill (guillaume.leclerc):yes, broken
Bernard Sfez / Tiki Specialist (Bsfez):to kick it
Guill (guillaume.leclerc):personally every time i start working on something, before branching on my own repo, i pull upstream first so that i branch from the latest update

Jonny Bradley (jonnybradley):-)
Gour (gour):gary: have you tried https://www.breezy-vcs.org/
Gary Cunningham-Lee (chibaguy):No, I haven't, Gour. I'll take a look.
lucia$ d' being ?♂ (luci):Gour: 2013 Breezy Team - is anybody using it actually? I tried only Mercurial once and that is it (from the alternative VCSs)
Gour (gour):it can use git format, but have some humanness
lucia$ d' being ?♂ (luci):TAG meeting is in a month or so
lucia$ d' being ?♂ (luci):Gour: ah, interesting
Gour (gour):luci: breezy could simplify using of git for some, it's actively developed....for my own projects i use Fossil
lucia$ d' being ?♂ (luci):very choppy here as well

luciash d' being ?♂️ (luci): As I did not get it much, how to do it easily on my own, sorry...
Jonny Bradley (jonnybradley):
   \Tiki\Lib\wiki\WikiLibTest::testProcessPageDisplayOptions
luciash d' being ?♂️ (luci): Can you edit the wiki pages offline too?
Gour (gour): in regard to PWA, I'm mostly interested to be able to work on larger content (e.g. article writing using markdown) and then being able to submit it online...
luciash d' being ?♂️ (luci): In other words it is easier to create new content, which needs to be submitted later when online, than trying to edit existing content which needs to be cached first from the database for offline editing
Bernard Sfez / Tiki Specialist (Bsfez): making coffee while starting
Jean-Marc Libs (Jyhem): This looks like a whole new language ✗
Guill (guillaume.leclerc): vue component include the html (in the template), the js (object oriented) and the CSS
luciash d' being ?♂️ (luci): bye!
