What

See Roundtable Meetings for a detailed description.

Topics

First hour, quick news

1. Releases (as usual)
2. Promotion (maybe better as a longer part 2 discussion)
3. Site speed (especially Since Your Last Visit module)
4. Tiki.org contact form field validation (before submitting) - avoiding loosing content
   We need to avoid having the content of a form erased because of an error.

   3rd attempt - your subject line doesn't seem to like non-alpha characters, my guess...
   One thing that really p****s me off about online forms is when the company tells you you've made an error, and then wipes the form clean. My bad for not protecting myself from that by copying everything or doing everything in notepad first, but really... *

5. Elasticsearch support - which versions of Tiki support which versions of ES? (should be documented somewhere)
6. ...

put your topic (max. 5-10 minutes) into the list above

Second hour, longer topics

1. Profiles Reboot
   - Establish Best Practices for inter-profile cooperation and dependencies.
   - E.g. If we defined a reserved page-name and a Category into which Profile authors could place their Profile's admin page during install, it would mean every Tiki could have a centralized
Could we create a Profile dependency tree?
Could our Features page included proven Out-of-the-Box solutions and included a step-by-step guide to implement each of these solutions, might Tiki usage start recovering?
Could the Profile creation process auto-create a manual installation checklist?
Could we auto-generate a Profile conflict matrix?
Can we rewrite the Profile documentation so that it is comprehensible to newbies who want to learn how to create Profiles? Maybe a Guide or Video?

- I apologize for the negativity but, IMO, the sorry state of our Profiles is what is killing off Tiki. (@BlissTiki)
  - Seriously! Are there any Out-of-the-Box Tiki Profile solutions which can compete with other free apps currently on the market?

Don’t apologize. ;-)
- Creators should be able to create them in a few clicks with options (to set fields names or pages names or currency for example)
- Users should be able to use them in 3 clicks (and the options)
- They aren’t updated because it is complicate to maintain a profile (let’s make it simple)... or it doesn’t pay (let’s create a market place or encourage donations to creators).

2. Wish list cleaning (again)
   1. ListExectute to alert posters of ancient wishes they will be closed automatically
   2. Then closing them automatically
   3. Better use of Priority field (i set the search page to use that sort order but the data need cleaning up)

3. Git merge requests (again), i spent a lot of time and failed again
4. ...

Follow-Up

- ...

*put your follow up action(s) when you're done into the list above*

Chat log
Guest: guill:yes
luciahs d' being ?♂ (luci):pain
Bernard Sfez / Tiki Specialist (Bsfez):ha ha ha
Guest: guill:??
Roberto Kirschbaum (robertokir):We have this...
Roberto Kirschbaum (robertokir):https://dev.tiki.org/How-to-release%3A-Follow-up
Jonny Bradley (jonnymbradley):https://tiki.org/Communications-Team
Guest: guill:i've used Buffer in the past
Guest: guill:service to share to many social media platforms. free accounts have a few connections possible
Guest: guill:i paid. was pretty good.
Guest: guill:agreed with Bernard
luciahs d' being ?♂ (luci):Yup, Buffer and deliver.it are the main ones I think but it would be better to have a feature, yep, I was thinking the same as Gary.
Bernard Sfez / Tiki Specialist (Bsfez):https://buffer.com
Bernard Sfez / Tiki Specialist (Bsfez):https://buffer.com
Bernard Sfez / Tiki Specialist (Bsfez):https://dlvrit.com
Bernard Sfez / Tiki Specialist ( Bsfez):they may be more of course...
luciahs d' being ?♂ (luci):they focus on one thing
luciahs d' being ?♂ (luci):we would need a team of developers watching the API changes
Bernard Sfez / Tiki Specialist (Bsfez):let's have facebook login working fine first
luciahs d' being ?♂ (luci):I agree
Bernard Sfez / Tiki Specialist (Bsfez):https://tiki.org/Communications-Team
Guest: guill:agree with luci
Gary Cunningham-Lee (chibaguy):Does anyone else have trouble with "User Information" popups staying popped up too long, on tiki.org pages?
Gary Cunningham-Lee (chibaguy):I have problems getting them to disappear.
luciahs d' being ?♂ (luci):yep, exactly what I was thinking, if there is some free mid-api for Buffer we could use that (if that one does not change that often)...
Roberto Kirschbaum (robertokir):I confirm that difficuty Gary
Guest: guill:https://github.com/godbout/buffer-php-sdk
luciahs d' being ?♂ (luci):it does not have to be integrated in Tiki but we can just use some meta tag or JS something for tiki.org
luciahs d' being ?♂ (luci):that would make sharing the article on the social media easier
Bernard Sfez / Tiki Specialist (Bsfez):@Gary, I hate these actually on the file galleries with thumbnails just impossible to see anything even with no information shown in popup...
luciahs d' being ?♂ (luci):thanks Guill for the link and suggestion
Jean-Marc Libs (Jyhem):+1 for using the buffer sdk
Guest: guill:no worries
Guest: guill:kinda forgot about it to be honest, while i worked on it last week lol
Guest: guill:but Bernard mentioning help, i thought about it
Guest: guill:but i don't want to touch social media accounts ?
luciahs d' being ?♂ (luci)::D
Philippe (philmzo):I left another feedback when I registered days ago. I had to try 6 times to register on tiki.org
luciahs d' being ?♂ (luci):We can just put a warning there that it will not accept these characters at least
Philippe (philmzo): Looks like my feedback didn't reach you too. Maybe we lose even more register attempts.

Bernard Sfez / Tiki Specialist (Bsfez): Ha ha ha... Luci, THERE is a warning

luciash d' being ?♂️ (luci): Ah, OK

luciash d' being ?♂️ (luci): People should read that ×

luciash d' being ?♂️ (luci): Not the bots

lucia d' being ?♂️ (luci): -p

lindon: @Philippe - was the error CSRF related?

luciash d' being ?♂️ (luci): Philippe: still not received validation confirmation for your registration? Sorry about that!

Philippe (philmzo): I don't know. Fields on screen are changing after first attempt.

Philippe (philmzo): The best way is to logout and give a try to register

Philippe (philmzo): exactly Bernard

luciash d' being ?♂️ (luci): That is the bug (confirmed iirc) that when the server validation fails it comes back with the registration form but the tracker fields are missing

Jonny Bradley (jonnybradley): https://tiki.org/Contact-Us

luciash d' being ?♂️ (luci): @philmzo so you were able login in the end or not yet?

luciash d' being ?♂️ (luci): It was on the registration form

luciash d' being ?♂️ (luci): yep

Philippe (philmzo): yes after copy-pasting a lot ×

luciash d' being ?♂️ (luci): Contact form works fineafaik

Philippe (philmzo): I also sent a feedback message and it looks like it didn't reach you

luciash d' being ?♂️ (luci): @philmzo: we are very sorry for the inconvenience

luciash d' being ?♂️ (luci): we will try to fix this finally and for all (hopefully)

luciash d' being ?♂️ (luci): yeah, jonny, what a shame

Philippe (philmzo): It tests for motivation ×

Jean-Marc Libs (Jyhem): :-)

luciash d' being ?♂️ (luci): yep, true, you were very stubborn to get your account ;)

luciash d' being ?♂️ (luci): That was jonny - I suppose he is busy now

luciash d' being ?♂️ (luci): fixing the bug ×

Gary Cunningham-Lee (chibaguy): If I enter Japanese in the user name field, the minimal form comes back saying "invalid username" but doesn't say why. Also I don't know what happened to the other fields like sourceforge username, and there was no "why do you want to register?" question in either form presentation.

Guest: guill::D

Guest: guill: oh nice

Guest: guill: there's a page yes

Guest: guill: I used the matrix for the ES versions of tiki docker

Marc Laporte (marclaporte): @Jonny: http://doc.tiki.org/Elasticsearch#Support_matrix

Guest: guill: http://doc.tiki.org/Elasticsearch#Support_matrix

Gary Cunningham-Lee (chibaguy): tiki.org is the slowest Tiki site that I regularly access.

luciash d' being ?♂️ (luci): I like the slow flow ×

Guest: guill: this matrix is important because I use it for defining the versions handled by tiki docker

luciash d' being ?♂️ (luci): In this hectic age

Roberto Kirschbaum (robertokir): Did I hear 21.x works with ES 7?

Gary Cunningham-Lee (chibaguy): tiki.org is telling people to slow down and enjoy life ; -).

luciash d' being ?♂️ (luci): D × ×
luciash d' being 🌡️ (luci): Oh, really? Validation of what? Sorry, I am a bit lost
Jean-Marc Libs (jymphem): Why would tiki.org download css from themes.tiki.org?
Gary Cunningham-Lee (chibaguy): It's for the URL popups for sister-sites and wikipedia, etc.
Bernard Sfez / Tiki Specialist (Bsfez): I need to be offline 2mn
Marc Laporte (marclaporte): @luci: that was a request by SourceForge.net at the time (use their logo)
Marc Laporte (marclaporte): But that may have changed, and we can stop if it causes issues
luciash d' being 🌡️ (luci): @Marc: yes we will use their logo but why to load it from their site?
luciash d' being 🌡️ (luci): to track its usage?
Marc Laporte (marclaporte): Yes
Gary Cunningham-Lee (chibaguy): Maybe we should show both SourceForge and Gitlab logos.
Gary Cunningham-Lee (chibaguy): (linking to our repositories)
Jonny Bradley (jonnybradley): https://doc.tiki.org/Requirements
Bernard Sfez / Tiki Specialist (Bsfez): A propos Es, anyone knows about Groonga?
Bernard Sfez / Tiki Specialist (Bsfez): https://groonga.org/docs/characteristic.html#groonga-overview
luciash d' being 🌡️ (luci): nope Bernard, you are too ahead of us
Guest: guill: http://doc.tiki.org/Requirements
Bernard Sfez / Tiki Specialist (Bsfez): ha ha ha... Someone want to implement it in Tiki
Guest: guill: ??
Marc Laporte (marclaporte): Yes, PHP 7.4
Marc Laporte (marclaporte): and 8.0 in a few months
Guest: guill: 8 ?
Marc Laporte (marclaporte): William Bliss is from USA
Gary Cunningham-Lee (chibaguy): I just noticed the tiki.org left-column menu using the old .png icons. Quite retro.
Marc Laporte (marclaporte): PHP8: https://stitcher.io/blog/php-jit
Bernard Sfez / Tiki Specialist (Bsfez): First let's agree to change the name.
Bernard Sfez / Tiki Specialist (Bsfez): Contact information tracker profile... instant
Marc Laporte (marclaporte): PHP8: https://stitcher.io/blog/php-jit
Bernard Sfez / Tiki Specialist (Bsfez): First let's agree to change the name.
Bernard Sfez / Tiki Specialist (Bsfez): A propos Es, anyone knows about Groonga?
Bernard Sfez / Tiki Specialist (Bsfez): https://groonga.org/docs/characteristic.html#groonga-overview
luciash d' being 🌡️ (luci): @Marc: yes we will use their logo but why to load it from their site?
luciash d' being 🌡️ (luci): to track its usage?
Marc Laporte (marclaporte): Yes
Gary Cunningham-Lee (chibaguy): Maybe we should show both SourceForge and Gitlab logos.
Gary Cunningham-Lee (chibaguy): (linking to our repositories)
Jonny Bradley (jonnybradley): https://doc.tiki.org/Requirements
Bernard Sfez / Tiki Specialist (Bsfez): A propos Es, anyone knows about Groonga?
Bernard Sfez / Tiki Specialist (Bsfez): https://groonga.org/docs/characteristic.html#groonga-overview
luciash d' being 🌡️ (luci): nope Bernard, you are too ahead of us
Guest: guill: http://doc.tiki.org/Requirements
Bernard Sfez / Tiki Specialist ( Bsfez): ha ha ha... Someone want to implement it in Tiki
Guest: guill: ??
Marc Laporte (marclaporte): Yes, PHP 7.4
Marc Laporte (marclaporte): and 8.0 in a few months
Guest: guill: 8 ?
Marc Laporte (marclaporte): William Bliss is from USA
Gary Cunningham-Lee (chibaguy): I just noticed the tiki.org left-column menu using the old .png icons. Quite retro.
Marc Laporte (marclaporte): PHP8: https://stitcher.io/blog/php-jit
Bernard Sfez / Tiki Specialist (Bsfez): First let's agree to change the name.
Bernard Sfez / Tiki Specialist (Bsfez): Contact information tracker profile... instant
luciash d' being 🌡️ (luci): I think some of the profiles are too complex to maintain. They could be easier to maintain if they were much more simplified.
luciash d' being 🌡️ (luci): @Marc: yes we will use their logo but why to load it from their site?
luciash d' being 🌡️ (luci): to track its usage?
Marc Laporte (marclaporte): We haven't gotten to that yet
luciash d' being 🌡️ (luci): There is the fatal bug still if you try to preview a profile btw...
luciash d' being 🌡️ (luci): *profile
luciash d' being 🌡️ (luci): I hear a waterfall
Roberto Kirschbaum (robertokir): @Lindon, your mic is very noisy...
Roberto Kirschbaum (robertokir): thanks!
Philippe (philmzo): And also have a wiki page to list the tracker content in the profile. I'm still bumping with relational tracker data.

luciahs d' being ?♂ (luci): You mean we would be connected all day in the BBB meeting since the 10 o'clock meeting? Can you imagine that?

Gary Cunningham-Lee (chibaguy): :-)

Jonny Bradley (jonnybradley): Something like that Luci, but more flexible - small rooms doing stuff, maybe occasional big (10 o'clock) meetings?

Bernard Sfez / Tiki Specialist (Bsfez): Don't turn me into Google defender! I don't use those only when my daughter teacher ask me too.

Gary Cunningham-Lee (chibaguy): :-)

luciahs d' being ?♂ (luci): I am willing to invest my time in improving the Profiles UI/UX because it is in my interest but I cannot work on fixing everything broken there now - so who is with me (for fixing the backend bugs)?

Bernard Sfez / Tiki Specialist (Bsfez): +1 Luci

Marc Laporte (marclaporte): https://doc.tiki.org/PluginFitnesse

Marc Laporte (marclaporte): To test your math formulae.

Bernard Sfez / Tiki Specialist (Bsfez): I didn't say it break. It is working (for me) The currency preferences (select your currency) is not working.

Bernard Sfez / Tiki Specialist (Bsfez): Or how we say it in Klingon: "Ha' neH Qu' 'oH"

Bernard Sfez / Tiki Specialist (Bsfez): Let's just do it.

luciahs d' being ?♂ (luci): Good point, Gary, true.

luciahs d' being ?♂ (luci): Here is the bug report about the profile preview error: https://dev.tiki.org/item6971-Profile-Preview-Changes-button-just-brings-up-modal-with-fatal-error

Bernard Sfez / Tiki Specialist (Bsfez): Don't we have already a "Profile reboot/revamp" page

luciahs d' being ?♂ (luci): still not fixed after two years of reporting it

Gary Cunningham-Lee (chibaguy): https://dev.tiki.org/Profiles-revamp

Bernard Sfez / Tiki Specialist (Bsfez): http://dev.tiki.org/Wishlist+Search+Page?default%5Bcontent%5D=profiles#sort_mode=modification_date_asc

luciahs d' being ?♂ (luci): What if we extend the in-built status field to allow admins to define their own statuses optionally among the o,p,c?

luciahs d' being ?♂ (luci): Too many issues ahead because of the tie to the permissions?

Marc Laporte (marclaporte): Maybe we could have a button: "I can't reproduce", and once we have 3, it closes in that status.

Guest: guill: LOL

Guest: guill: the usual answer: do it then

Guest: guill: good luck!

luciahs d' being ?♂ (luci): the question is quick, but the answer...

lindon: @marclaporte - I like that idea

Jonny Bradley (jonnybradley): Also this: "Unable to get information from show2.tikiwiki.org"

luciahs d' being ?♂ (luci): show2 is on xavi

Philippe (philmzo): This week, I wrote a wish that was a fix actually. I thought it was more "Feature Request" than Bug. It points to a REST PHP script that I successfully run with TW21

Jean-Marc Libs (Jyhem): Week day or weekend?
lucia:sh d' being ?♂️ (luci): but it seems to work for me (show2)
Guest: guill::D
lucia:sh d' being ?♂️ (luci): ha ha
lucia:sh d' being ?♂️ (luci): but it will not be real tikifest as we cannot go to a pub together
lucia:sh d' being ?♂️ (luci)::
lucia:sh d' being ?♂️ (luci): we can create any
lucia:sh d' being ?♂️ (luci): can
lucia:sh d' being ?♂️ (luci): with the plugin
lucia:sh d' being ?♂️ (luci): on tiki.org
Marc Laporte (marclaporte): https://community.jitsi.org/t/breakout-rooms/33486/13
lucia:sh d' being ?♂️ (luci): yes
lucia:sh d' being ?♂️ (luci): we can make a little break and come back in a few mins?
Gary Cunningham-Lee (chibaguy): Actually I need to go pretty soon.
lucia:sh d' being ?♂️ (luci): I have no issues at all with Git because I work without the fork the old Tiki way ;-) (direct push access)
Bernard Sfez / Tiki Specialist (Bsfez): Please add your thoughts and dates and hours:
https://dev.tiki.org/Profiles-revamp#Profile_reboot_May_2020
lucia:sh d' being ?♂️ (luci): you should never need to use the force (even with forks)
lucia:sh d' being ?♂️ (luci): as you wish
Guest: guill: just before leaving
lucia:sh d' being ?♂️ (luci): np
Guest: guill: if anyone interested, the offline Tiki doc is ready
Marc Laporte (marclaporte): Fantastic idea!
Guest: guill: send me an email for more info
Guest: guill: if not interested then have a good night?
Marc Laporte (marclaporte): @Guillaume: I am interested
