What

See Roundtable Meetings for a detailed description.

Topics

First hour, quick news

1. How to successfully use again PluginTogether for real time collaborative writing in t.o (or other sites)
2. Check previous meeting “follow up” section if time left
3. Let’s set up ListExecute to nag bug reporters to test their bugs when set to “Please retest” (instead of just talking about it ;)
   - By means of PluginListExecute + Scheduler or Tracker Events

*put your topic (max. 5-10 minutes) into the list above*

Second hour, longer topics

1.1.1. some topics may come back in the next TRM

- About how to improve getting feedback to new users in forums, etc.
  - Asynchronous discussions: User Forums (many) vs Users List (1)
    - indicate users to edit forum posts in t.o forums once they feel that their messages/help requests are solved, with the prefix 
      "[SOLVED]"
    - we could add a custom module with jQuery code in it and display a "Solved" button above the Forum thread which would pre-fill "SOLVED " to the topic on click for them so they do not need to type it manually maybe?
- there is number of Replies in the Forums displayed but they are not indexed - add that number to the Unified Search index so we can list? Jonny?
• when / how to automatically change status of long (potentially obsolete) bug reports, etc.
  ◦ Raise the old thread again. (and see above)

  See below under the section of "follow up" actions

• Branching Tiki 22.x using git (let's do it and document - also merging back to trunk/master with git: how to?)

1.1.2. show2.t.o future

Server show2.t.o consumes new 10Gb every month, aprox. See those posts and their comments:

  • https://tiki.org/blogpost849-show2-t-o-running-out-of-disk-space-temp-nfs-disk-added#comments
  • https://tiki.org/blogpost851-2020-08-19-Reboot-show2#threadId75204

Last emergency action to get free space will probably last until January 2021, but some new solution needs to be sorted out, or current show2.t.o setup will possibly stop working soon after.

Recording

• View and listen to the recording here.

Follow-Up

Suggestions of actions to be taken:

1.1. Fade Section in forums

Update the message in the fade section to indicate that once the poster of a topic (the first message of a forum thread) is comfortable with the feedback received (question is answered, pointers requested were received, etc), that poster should edit the title of the forum post to add the prefix [SOLVED] (Mike, Xavi)

1.2. Count replies to a thread

Make a wiki page to display them: Forums Dashboard

1.3. Automatically update bug reports based on some criteria

Let's set up ListExecute to nag bug reporters to test their bugs when set to "Please retest" (instead of just talking about it ;)

- bug report with no changes in 1 year, and o or p: send reminder to reporter, & after 1 month this will automatically change to item status **closed** and change bug status to "**Obsolete**".
- every month, check those "please retest", and send email to request testing again. After 3 months, change to item status: closed, and bug status: "**Please retest**"

Let's make this happen before the next month. Willing to help/make it happen: Jonnyb, xavi

### 1.4. Add bug reports detected during the TRM

**Double session conflict with PluginTogether in t.o during the meeting.**

First user clicks at the plugin together button in the side module, and go to edit the TRM page. Second user clicks also to the PluginTogether button, and click at the edit page button. We (6 users) ended up into something like one or the other session: lines added by user2 were not seen by user1 but by user 4, and some other users were in the same session as user1.

(Xavi)

[https://dev.tiki.org/item7544-Prevent-usability-issue-when-more-than-1-PluginTogether-session-to-edit-same-page](https://dev.tiki.org/item7544-Prevent-usability-issue-when-more-than-1-PluginTogether-session-to-edit-same-page)

**Forum posts without title but body get apparently lost**

(Mike) added a Bug Report here is a link

### 1.4.1. Updating the Where to commit

**Where to commit**: Fabio & Roberto

**Asking about CI pipeline free threshold in gitlab.com**

Jonny asks Ricardo through the devel list.

[https://dev.tiki.org/item7543-Topic-type-is-not-shown-to-plain-registered-users-in-t-o-forums](https://dev.tiki.org/item7543-Topic-type-is-not-shown-to-plain-registered-users-in-t-o-forums)

**Prepare some show3.t.o**

Somewhere in some faster hosting with more disk space (1Tb?, since it currently consumes new 10Gb/month)

See ongoing discussion here:
