3 hamburger on mobile ????
yes we can disable it

it is obsolete and not maintained (i mean enhanced) anymore

In general, I want to propose to mark some pages as outdated. Is that possible?

it is kind of nostalgia like browsing geocities

@Aris you can put a remark on top of the page like ^This page content is obsolete^ or maybe we can create a category for that and you can just categorize the page using the left hand column module?

Is there anyone voting to "no" for disabling the directory feature on Tiki?
no

@lucy the problem is also as Bernard said- dead pages searchable and shows on search engines
ga
Gary Cunningham-Lee (chibaguy)
Pages in "Archived" could be registered-user-only visible.

we can put NOINDEX,NOFOLLOW on them maybe? using the metattag plugin in custom module assigned by the category

(If there's value in looking at archived pages, for users.)

A lot of work... I am thinking of automated ways..

It will be automated but you need to do the "lot of work" first ;)

Group them together!

.... dark is really dark... Make me feel uncomfortable. Can't we have a less dark dark?
I just wanted to ask ;-)
is it editable?
Look very nice!
no we cannot have less dark
use the light option instead
if you prefer
... I want a dark-grey option ;-)  
Why don't we get full width with the left collapsing?
or use your own theme ;)
:-p
it is customizable css?
vote for static look, only dark and lite
