Roundtable Meeting 2021 11

Volunteering Facilitator: Bernard Sfez / Tiki Specialist

When

Sunday, November 21, 2021 at 15:00:00 UTC time (click to check time zone in your location)

Votes

What

See Roundtable Meetings for a detailed description.

Topics

First hour, quick topics

1. Tiki security releases: News and status
2. Should we consider supporting Fontawesome Pro?
   1. Questions: 1) Would that be philosophically compatible with an open source project? 2) Does "support" mean include in the Tiki package and use it in the interface, etc.? 3) Does the pro license allow freely distributing the pro icons? Seems like maybe not. From https://fontawesome.com/plans: "Pro is commercial software, so there are some restrictions. The biggest one is that you cannot distribute Pro to folks not specifically covered by your license (e.g. you can't provide the files in your open source public repo)."
   2. Related: Bootstrap also has an icon set now (https://icons.getbootstrap.com/). This could be added along with Bootstrap 5.
      https://themesberg.com/blog/bootstrap/bootstrap-icons-vs-fontawesome
3. Tiki forums
   Encouragement to use the Forums
   1. Tiki indexes "recipes"
      1. In-a-InnoDB-populated-database-the-indexes-are-MyISAM?
      2. Solution for the index multiplication of constantly updated Tiki
   2. What is your solution to have user "private pages"?
      1. https://tiki.org/forum/thread77746-Can-we-have-user-private-pages?
3. Help needed on Tiki.org forums (5 month old)
   1. Broken display for sub-forum
   2. Not-possible-to-move-discussions-in-forum
4. How to deal with a bug that can’t be easily explained (even the topic is hard to name)
   Example: tracker field visibility, all my attempt to use it on Tiki 18 to 23 with plugin List or CustomSearch
failed.
It is very hard to reproduce, touches too many areas and combinations are endless.

+ Bernard Sfez / Tiki Specialist: Please demonstrate on a show instance. If it's not possible to configure via the web interface, just add a task on dev.tiki.org, and avan.tech and we will add it, as it's a priority to as much as possible via the web interface.

5. Advanced Shopping Cart revamp for Tiki 24
   
   2. https://gitlab.com/tikiwiki/tiki/-/merge_requests/935

7. Fosdem will happen online again
   
   1. Who can prepare a presentation about a Tiki high point which will be appearing for end of January?

8. Mailing Lists / Newsletter administration + moving of Email server -> we need a team to fix a number of issues
   
   mainly a temporary project or task force.. Who will participate, when we start, finalize at which deadline?

   
   Ex: Torsten subscribed the Tiki Community Calendar. Thus after the vote for the Round Table meeting Torsten automatically gets a new event to his Thunderbird and Android calendars. This is just awesome!

   Short description or demo optional (if enough time).

10. Tiki and translations
    
    2. https://dev.tiki.org/Contextual-translations
    3. https://dev.tiki.org/Translations-Revamp
    4. Translations - short here and postpone to December or today longer in 2nd hour?

11. ...

   put your topic (max. 5-10 minutes) into the list above

**Second hour, longer topics**

1. Cookies consent status Cookie-consent-improvements
2. Deeper discussion about How to Have Fewer Bugs in Tiki: What are the patterns of the bugs (most frequent and most nasty) (Marc) (45 minutes)

**Recording**

The recording of the meeting (webcam, screen sharing, and text chat) is available here: here.

**Chat log**

(Sorry about the extra characters — user icon initials.)

:-)
be
Bernard Sfez / Tiki Specialist (Bsfez)
00:05:21
You look perfect Torsten
Torsten Fabricius (Torsten)
00:05:38
Thank you Bernard

Hello everybody.

Bernard Sfez / Tiki Specialist (Bsfez)

5 websites

And you need to give the url, name

FYI: https://dev.tiki.org/item7941-Configuration-Wizard-does-not-save-changed-prefs-since-Tiki22

Jonny, did you mean, by "support FA pro icons" just having some license key field and if enabled then support all the classes from the pro pack?

Thanks Xavier de Pedro

Ideally, forums should be public, so findable via search engines

BTW, "Free, high quality, open source icon library with over 1,500 icons."

https://icons.getbootstrap.com/ - "Free, high quality, open source icon library with over 1,500 icons. "

Heh, great minds think alike ;-).
+1 for "forums should be public"

Guest: Gour
00:12:41

+1 for using forums more...what about bridging tiki-user to forums somehow?

to
Torsten Fabricius (Torsten)
00:13:26

+1 for most forums public ... there might be reasons to have a specific forum non-public, for ex maybe a security team forum

lu
luciahs d' being (luci)
00:15:07

Forums always were public except the one copying emails from mailing list to avoid leaking untreated email addresses against spam harvesting

jo
Jonny Bradley (jonnybradley)
00:16:39

/me still has no idea what sub-forums are for, or who added them, sounds like it was done badly (forums work fine for me)

lu
luciahs d' being (luci)
00:18:18

That should be task for the developer/committer to test it before release, no?

ma
Marc Laporte (marclaporte)
00:19:05

luciahs d' being (): "leaking untreated email addresses against spam harvesting" Is there a task for this?

to
Torsten Fabricius (Torsten)
00:19:55

We need some agreement how to communicate settings that are changed globally on a Tiki community website and why and how it should be

lu
luciahs d' being (luci)
00:20:03

marc, not sure... lemme search the bug reports

to
Torsten Fabricius (Torsten)
00:23:14

It would be a good idea if we - including pointing to myself - would point a bit more energy to the Tiki forum posts and support users who ask questions.

ro
rodrigolzd
00:23:33

are the forums more active than the live chat?
Marc: I do not see it reported in this category: https://dev.tiki.org/Wishlist+Search+Page?default%7Esearch=forum#cat=85

Marc Laporte (marclaporte)

"That should be task for the developer/committer to test it before release, no?" Ideally, yes, and perhaps it worked at the time. But someone needs to follow-up with that developer.

to

Torsten Fabricius (Torsten)

not sure. They have been quite active, but once questions would be never answered there would be no point.

guest

if subforums are problematic, why not just getting rid of them...some subforums do not have much posts, afaict

guest

...and continue using forums which do work?

to

Torsten Fabricius (Torsten)

(was Rodrigo Primo)

lu

luciahh d' being [] (luci)

marc but I am pretty sure it was in the gardeners blog

guest

Saša Janiška, I agree.

to

Torsten Fabricius (Torsten)

@all: do I understand right, that we deactivate tablesorter for forums on tiki.org for a preliminary time, cause s.th. is broken?

to

Torsten Fabricius (Torsten)

(Bernard: I did not understand

be

Bernard Sfez / Tiki Specialist (Bsfez)
Torsten Fabricius: according to this blog post yes, should be deactivated:
https://tiki.org/blogpost883-TableSorter-was-deactivated

as far as "mystical bugs" - have a template when reporting if it does not already exists, easier to provide demo showing and/or someone doing triaging...just a thought

Bernard Sfez / Tiki Specialist (Bsfez):
installation cannot be tested but I recall one or two other thing

Bernard: why not discussing "bug" in some communication channel - chat/list/forum?

maybe it's just misunderstanding of one's usage of Tiki
Xavi (as xavidp - admin) (xavidp)
00:37:30
curious: there are 2 results at this search: https://doc.tiki.org/tiki-searchindex.php?filter%7Econtent=subforums
to
Torsten Fabricius (Torsten)
00:37:30
number of chats -> imho should be (re)merged to one central chatroom and optional subrooms based on topic, task or group
ro
rodrigolzd
00:37:33
so, i think bernard just said there are way to many communications channels options and that causes problems
ro
rodrigolzd
00:38:39
I never think of tiki forums and mailing list
ga
Gary Cunningham-Lee (chibaguy)
00:39:03
The situation around chat is messed up right now - kind of a transition phase, I think. But should improve in the future.
xa
Xavi (as xavidp - admin) (xavidp)
00:39:18
and I could only find relevant info on dev.t.o about subforums here:
https://dev.tiki.org/item7765-Tablesorter-filter-is-misplaced-in-the-forum-should-be-below-the-subforum-list?highlight=subforums
to
Torsten Fabricius (Torsten)
00:39:40
Rodrigo Primo I agree in respect of chat for example, which "helped" me to lose a bit connection to the community for a while and I find it hard to find back ... not too much, as I know the people and have some access, but I feel it quite complicated at this time.
xa
Xavi (as xavidp - admin) (xavidp)
00:39:43
so please whoever added that feature, drop some lines in doc.t.o at least
be
Bernard Sfez / Tiki Specialist (Bsfez)
00:40:12
That's good news Marc !
be
Bernard Sfez / Tiki Specialist (Bsfez)
00:40:15
thanks
to
Torsten Fabricius (Torsten)
I agree ... do you think I could any help or better just wait?

Marc Laporte (marclaporte)

We will need testers in 3-4 weeks

Marc Laporte: cannot find it so I will fill in the bug report on dev

I volunteer as usual

Marc Laporte (marclaporte)

Hello to everyone (18 participants) ;-) 

Live chat is the closest thing we have to being able to call a company when we have a problem. At least I feel like it's what I get from live chat

Torsten Fabricius (Torsten)

Looool ... not yet working. It is less broken than it was. I love that type of description.

Thank you developers, honestly, you are doing a great job currently. We just have so much work.

Anyway ... Tiki is currently quite awesomeful developing.

Thx all.

Gary Cunningham-Lee (chibaguy)

Torsten Fabricius - I was looking for some written info about the options, etc. but didn't find them yet.

Xavi (as xavidp - admin) (xavidp)

The longer that we keep using email lists for our own communication (among devs in tiki-devel list besides de devel forum, and with users in tiki-users list besides the plenty forums shown in t.o) the less effort will be added to improve/fix our own solution for async communication using tiki forums for others.

Marc Laporte (marclaporte)

https://xorti.gitlab.io/wikisuite-ppa/ and https://gitlab.com/xorti/wikisuite-ppa will be ready for testing in a few weeks

Guest: Gour
If we set a date to cancel email lists (convert them in read only), we will have efforts from the whole dev community to fix whatever is needed to make tiki forums usable.

Oh, is there a Tiki Telegram group?

Marc

I am currently setting up a number of Tikis for testing and trying stuff ... what tests you need - I did not get all audio.

I am currently focussed on Calendars, then Webmail and Kanban.

Matrix protocol is becoming quite popular I reckon

go, Gary. I try to collect and put stuff on a preliminary WikiPage and share.

so, where is the real chat going on?

https://gitter.im/tiki-org/community

I will announce it too then (list and social Network)

Also that - it's the matrix route to it

talk about fragmentation. less is more

torsten Fabricius (Torsten)
Marc ... testing WikiSuite ... I would need either a Computer or Raspberry or a websolution like VM

I think about, what I find shortly.

let me check if I have admin / managing rights there

Marc Laporte (marclaporte)

https://github.com/tikiorg

this is just for tiki right? not wikisuite?

just tiki was not available

Marc Laporte (marclaporte)
https://github.com/tikiorg
google search about tikiwiki sucks
be
Bernard Sfez / Tiki Specialist (Bsfez)

00:51:49
+1 for tiki-org or tiki.org or similar
lu
luciash d' being (luci)
00:52:02
on it
lu
luciash d' being (luci)
00:52:03
checking still
I think tikiwiki is professional, but it somekind limits expectations to wiki core feature. We are not only a wiki.

gary agree ... we are still aswell a versatile Tiki but not at all "only" a wiki"

We should any know what are the options and the way it works in the specific software

+1 to jonny aswell

make the name should be tiki-polom ✗

Marc: added you as admin there on gitter.im

I understand and that's fine.
I may be gladly join, I can't answer right now.
do we have a deadline?

+1 Torsten

what about CardDav?

Status of the Fosdem devroom will be on:
https://www.xwiki.org/xwiki/bin/view/Main/Events/FOSDEM%202022/DevRoom/Proposal/

with CardDav support I could get rid of using Baikal to have calcs/contacts sync between the phone/desktop/Tiki...

As I wrote we just got Slovak translations via Transifex last month
And that user did merge request and I just merged it.

So there are ways and it would be best if we "finished" the integration so these would be synced automatically as the API exists and it is doable.

But I understand almost nobody knows how to work with that.

I was surprised as well that we got that contribution via Transifex recently.

Sorry I am not on mic because it says my connection is terrible so I would be breaking up anyway ;-) I can coordinate with Torsten on that and try to prepare something for the next meeting.

Hi all, I use transifex for other project also. I don't know any other tool for translation. If we have any other good tool, I will be glad.

Ah, hi Ed! Ed it was! Thanks for your contribution man

Torsten just said his hands will be full with the email situation until next month, so maybe afterwards...
no problem....
be
Bernard Sfez / Tiki Specialist (Bsfez)
01:20:46
Problem of Tiki.org sub-forum solved. We don't have sub-forums anymore.
xa
Xavi (as xavidp - admin) (xavidp)
01:21:31
thanks Torsten for the report about successful caldav acces to tiki calendars, and for the nice detailed information in the doc.t.o page, which helped me to use it successfully
ma
Marc Laporte (marclaporte)
01:21:46
Next topic will be https://dev.tiki.org/How-to-Have-Fewer-Bugs-in-Tiki
to
Torsten Fabricius (Torsten)
01:22:01
Xavier de Pedro, great that my description already could be helpful
be
Bernard Sfez / Tiki Specialist (Bsfez)
01:23:03
Sorry, I missed it, can you post the url for the caldav?
ga
Gary Cunningham-Lee (chibaguy)
01:23:29
Thanks for that, jonny.
xa
Xavi (as xavidp - admin) (xavidp)

01:24:45
And yes those consent cookies thing is a real pain!
xa
Xavi (as xavidp - admin) (xavidp)
01:24:53
and indeed, the CardDAV equivalent needs some content in a similar fashion (guiding mere mortals on how to use carddav in Tiki), in case it's already usable: https://doc.tiki.org/CardDAV
jo
Jonny Bradley (jonnybradley)
01:27:25
Sorry, i was adding some more bugs
Bernard expressions as we talk about bugs worry me.

I'm trying to find perfect examples ;-)

we all suffer it ;-)  

is there a graph of the bug classifications?  

Or often it is conflict of two features where devs do not test all possible combinations of prefs enabled and disabled  

Which is understandable with those 1000 of options  

No graph  

increase test-coverage!  

im not a dev but from an admin/support point of view the problem seems to be the same as tech support issues at first.  

There are definitely patterns in Tiki's bugs: 1) "Neglected features" and things like wikiplugins that few people use/test. 2) New features that aren't tested in all/many instances. 3) ....
to
Torsten Fabricius (Torsten)
01:42:19
Or used not much features, important to a number of (typical or potential) paying customers
je
Jean-Marc Libs (jyhem)
01:42:34

rodrigolzd "is there a graph of the bug classifications?: yes, let me grab a link for you....
xa
Xavi (as xavidp - admin) (xavidp)
01:46:56
at least, a heatmap-like table display of them
jo
Jonny Bradley (jonnybradley)
01:48:20
brb
ro
rodrigolzd
i agree with Bernard. the simple things in tiki require more effort than other software...

Guest: Gour

marclaporte: lack of tests?

Bernard Sfez / Tiki Specialist (Bsfez)

I agree with you too ;-)

Guest: Gour

rodrigolzd

I think Bernard said features are limited because of the depth and spectrum of the problem the developer of the sees only for himself]

Bernard Sfez / Tiki Specialist (Bsfez)

"i agree with Bernard. the simple things in tiki require more effort than other software..."

I agree with you too ;-)  

Guest: Gour

maygu

Guest: Gour

(ro)

I think @Bernard is right and I understan Marc, that we need to distinguish wether we have this or that type of bugs, cause there are several types of bugs
to

Torsten Fabricius (Torsten)

in my opinion we could gain a lot from standard automatted tests, where we can continuously add more tests for new types of usage we learn about.
Guest: Gour  
02:00:48
i believe that Tiki should reduce number of options doing the same or very similar thing when the latter is achievable by e.g. composition of few simpler things

Bernard Sfez / Tiki Specialist (Bsfez)  
02:02:16
Our Tiki default

Guest: Gour  
02:04:18
marklaporte: it seems (to me) it is orthogonility problem ;)

rodrigolzd  
02:04:19
I think i understand that the issue is really how we look at the root cause, the cause is the reason why a feature exists. If a single user needs that feature, its not a feature that should be included into tiki. maybe a plugin (I know Marc hates plugins)

Gary Cunningham-Lee (chibaguy)  
02:04:24
Another way of categorizing: 1) Bug caused by interaction of user data and Tiki code 2) Bug not directly related to user data

Gary Cunningham-Lee (chibaguy)  
02:04:38
...or not involving user data

Gary Cunningham-Lee (chibaguy)  
02:05:00
(based on Marc's example of old Tiki site)

luciash d' being (luci)  
02:05:40
There are many bugs with wiki syntax but hard to fix so nobody cares about them ;)

luciash d' being (luci)  
02:06:00
For example a link in a parenthesis ;)

Guest: Gour  
02:06:25
luci: point for going full Markdown ;)

luciash d' being (luci)  
02:06:27
it takes the closing parenthesis as part of the resulting link

yup
je
Jean-Marc Libs (Jyhem)
02:11:19
He has the little "Presentator" icon.
to
Torsten Fabricius (Torsten)
02:11:27
What is the difference between unit tests and selenium tests or are Selenium tests just Unit tests with Selenium (sorry for dumb sounding question - just started with the topic)
be
Bernard Sfez / Tiki Specialist (Bsfez)
02:11:45
I saw but seems for an instant the screen was synchronised with Jonny's pseaking ;-) to
Torsten Fabricius (Torsten)
02:12:07
ah interface testing -> Selenium
lu
luciash d' being (luci)
02:12:14
Bernard: same ✗
lu
luciash d' being (luci)
02:13:15
We should really start removing "until there is not anything to remove" to achieve perfection ✓ to
Torsten Fabricius (Torsten)
02:13:59
Interface tests:
1. what Software to use (need decision)
2. what ressources we need to use this software?
3. who contributes to the team/group to take care on further developing and maintaining this type of tests?
gu
Guest: Gour
02:15:11
duplication!!
to
Torsten Fabricius (Torsten)
02:15:20
Marc: right - new further developments too long optional and not finalised ... start as option and replace after 3 versions
be
Bernard Sfez / Tiki Specialist (Bsfez)
02:15:31
Removing things that are not 100% working may be too radical. But I see it as "unneeded" dangerous situation to let so-easy to activate Experimental or obsolete things.

to
Torsten Fabricius (Torsten)
02:15:39
We dis that right with Bootstrap and wrong with Fullcalendar - I agreee
to
Torsten Fabricius (Torsten)
02:16:31
yes, put them into experimental and clearly mark all experimental stuff in admin interface, when experimental is activated.
gu
Guest: Gour
02:16:33
mar
be
Bernard Sfez / Tiki Specialist (Bsfez)
02:17:19
And it should be "complicate" to activate experiemental : Are you sure ? (put your admin password)
gu
Guest: Gour
02:18:13
marclaporte: maybe more of pattern of fauly behaviour which causes specific category of bugs, iow. by refactoring/simplifying code, getting rid of unnecessary options, increasing test-coverage...
gu
Guest: Gour
02:18:20
  * faulty
be
Bernard Sfez / Tiki Specialist (Bsfez)
02:18:27
"Experiemental" and "Obscolete"
be
Bernard Sfez / Tiki Specialist (Bsfez)
02:19:30
We have footnotes, references. many group type fields, etc...
be
Bernard Sfez / Tiki Specialist (Bsfez)
02:19:54
2 or 3 terms of uses and conditions
je
Jean-Marc Libs (Jyhem)
02:20:42
One person's "removing unnecessary options" may very well be another person's "regression" if they found a useful way of using the option

to
Bernard: yes, merging stuff to more robust features instead of one snippet for one task each I think makes a lot of sense (potentially)
But duplication I do not see as actually the real problem

Bernard Sfez / Tiki Specialist (Bsfez)

Shouldn't using PHP8 with Tiki23 not possible? (installation)

Jean-Marc Libs (Jyhem)

and in other cases, options have been broken for 10 years so they should be removed. It's not simple process

ro

rodrigolzd

php8 is not a problem from an admin point of view.

luciahs d' being (luci)

Sometimes it happens in the process... you have installed Tiki but then your OS decides to upgrade the PHP to PHP8
to

Torsten Fabricius (Torsten)

My problem with PHP7.4 / PHP8 is that even when I go down to PHP 7.4 I have dependencies with libraries that are PHP8

luciahs d' being (luci)

But I would not call it root cause

Bernard Sfez / Tiki Specialist (Bsfez)

From memory setup.sh will tell you you are using PHP8 and required is PHP7.4

But not a warning

ro

rodrigolzd

Marc is saying that tiki should go the debian way.... slow
to

Torsten Fabricius (Torsten)

Does he?

Guest: JoelDeo

i'd suggest to increase more well-established habits valid for any code - simplifying codebase, getting rid of obsolete/unused features, duplicates, test-coverage etc. and *then* digging deeper into possible patterns of bugs

I'd like to see something like this in Tiki:
"We see you had an error using Tiki, do you want to send a report to our technical team?"
Marc idea might work, but i think the issue is really classification of the features/bugs. sounds like the current system is lacking more tagging/classification.

02:41:20
thanks Bernard!
For quite some time I used to ask that in merge requests, @j-M

great idea. even testing tarballs need some template for testing

Thanks Jonny
to
to

Roberto: sometimes things need some time, but finally get a critical mass earlier or later

marc got a minute?

ok
gu

For now not yet
