Status/RoadMap

---

What we already have you can find in [RSSModules](#).

- Use title provided by RSS data in modules. **work in progress** [UserPageohertel](#)

Wishlist

---

- Most Tikiwiki styles don't render RSS newsfeeds very well. The bullet is lost and the items are smooshed together, making it difficult to tell where one item ends and the next begins.
- Showing new RSS items in a different color (since last check)
