Smarty

Smarty is the most popular template engine on Ohloh.net and is used by Tiki since the beginning of the project (2002). We upgraded to Smarty 3 in Tiki8 and 3.1 in Tiki9.

Since Tiki 15, if you want to modify a template, copy it and put the copy in the custom theme directory, e.g. themes/custom_theme_name/templates (it was /templates/styles/custom_theme_name/ prior to Tiki 15).

See Themes (“How To Create a Custom Theme”) for more details.

Tiki is the or among the most popular FOSS projects that uses Smarty.
