What

A tradition in the TikiWiki community, a TikiFest is when there is a meeting between at least 2 TikiWiki contributors that don't usually meet. This is an opportunity, usually, to drink adult beverages, get some laptops out and code wildly in group sessions and/or discuss about wiki technology and culture, etc. depending the mood and context. It is a great opportunity for Tiki users and Tiki power users to meet some of the developers and learn more stuff!

Those that can't attend physically will participate online (bug tracker, chat, forums, mailing lists and the wiki of course)

This TikiFest will be in collaboration with codeFest PHP Quebec 3.0 [http://codefest.ws](http://codefest.ws)

This will also be the time to finalize and launch TikiWiki 3.0!

Please, use the main channel "tikifests" for streaming, if possible, to avoid spreading videos over too many places. Ask any admin for the account details to streaming through the tikiwiki account at ustream.tv.
