A tradition in the Tiki community, a **TikiFest** is a meeting between Tiki contributors (that usually only meet online). This is an opportunity, usually, to socialize over drinks, get some laptops out and code wildly in group sessions and/or discuss about wiki technology and culture, etc. depending the mood and context. It is a great opportunity for Tiki users and Tiki power users to meet some of the developers and learn more stuff.

The main topic of this event is to improve both Tiki, **BigBlueButton** and the interaction between the two. **BigBlueButton** is an open source real-time collaboration tool. (Audio/Video/Screensharing/Chat), which is built upon several open source components and with a focus on distance education.

**Tiki** offers a built-in integration with **BigBlueButton**. You can try it out now at: [http://live.tiki.org/](http://live.tiki.org/)

**When**

August 15-16-17-18, 2010 *(Official Dates)*

We recently got the good news that Tiki has been offered a presentation slot during the SummerCamp Open...
Source Conference which will be held in Ottawa on August 14th. In order to maximize the synergies of both events, we have moved up the TikiFest by a week.

We hope this does not affect anyone's schedules and we can't wait to see everyone live and online for this exciting week in August.

What
This will be the first event where the focus will be on remote participants. Let's have a lot of people and push the limits of the system!
Wine and Cheese

On Wednesday August 18th at 6PM, the Tiki and BigBlueButton community wish to invite web development companies, systems integrators, designers, developers and open source enthusiasts at The Code Factory for a wine and cheese networking event.

Come learn how Tiki and BigBlueButton are leading the way in the online world of Collaboration and Communication and meet some of the developers that work on these great products.

Migrate live.tiki.org to new server

evo.cat.io will offer hosting

Integrating BigBlueButton in other systems

If you are interested in integrating BBB in other systems, please do show up. Many BBB developers will be present as well. Also, if your project is in PHP, you can re-use Tiki code (licensed LGPL so include-able in other apps)

PO & gettext
Any opportunites for us?

Some work was done years ago which enabled to translate Tiki using standard PO tools:

- [PO Convertor for TikiWiki](http://translate.sourceforge.net/wiki/toolkit/tiki2po)

Tiki Software Community Association

- Pascal, Marc & Nelson have some paperwork to attend to.
