Logistics

This is quite a patchwork! If you have a better solution, you just volunteered to be in charge of the next such meeting.

1. A dozen community members will be physically present in a conference room at CGCOM.
2. Sound & Video will be broadcast & recorded via Ustream.
3. Two projectors will be showing on the wall 1- the IRC chat 2- the Ustream video.
4. Remote participants will be able to participate
   1. On the IRC Chat (which is projected on the wall).
   2. Or via Skype audio. Contact Pascal St-Jean to be added. He will SkypeOut a POTS speakerphone in the conference room. Please have a headset or mute your mic when you are only listening.
5. All conclusions are to be added to this wiki page. All participants are responsible from transcribing stuff. That means you!
