Rick's TikiWiki User Page

Hi, I'm Rick! I've been using Tiki since early 2005, when I selected TikiWiki as the CMS for my primary website: KeyContent.org.

I am first and foremost an End-user Advocate — not a hard-core programmer. I have nearly 15 years of experience in usability, documentation, and training (primarily with computer software, but other fields too). My primary contributions to the Tiki community are:

- Monitoring the Forums and IRC channel, helping when I can.
- Working on the Tiki Docs
- Contribution useful plugins and mods, where I can.
  It has been a long time since I've done any real coding (does anyone still use Pascal and Fortran?), so most of my code contributions can surely be improved. You can read about some of my Tiki ideas modifications in my Tiki blog.
- Monitoring the TikiWiki feedback.
- Working the Tiki Promo Squad to improve Tiki's public image (or lack-there-of)

If you're new to Tiki, I encourage you to check out my online book: TikiWiki for Dummies Smarties — A beginner's guide to using TikiWiki. If you've used the guide and found it useful (or even if you didn't!), I'd love to have your comments.

Additionally, if you want to contribute to Smarties, that would be great too.

The easiest way to get Smart is by using the Smarties toolbar:
It provides instant (and constant) access to *TikiWiki for Dummies Smarties*, anytime you're online. Get it [here](#).

---

**About my handle**

I've been asked by several people.... "What does the **99** (in ricks99) signify?" Here's the story:

In the old days (back when 1200bps was fast and **Prodigy** was bigger than AOL), I got involved in **BBSing**. On one of the first sites I logged into, I tried to select **ricks** as my username, but it was already taken. So I tried **ricks1** and it was taken too. Then I tried **ricks2**, but it was taken too.

Rather than continuing up number list, I decided to start at the top and work my way down. I started with **ricks99**. It worked, and the rest, as they say, *is history*.

**New Blog**

This page has become too long (and out of date). So, I started a [Tiki Blog](#) to describe and document my personal Tiki journey. Enjoy....

**My Sites**

Currently, I admin the following Tiki-based sites:

<table>
<thead>
<tr>
<th>Site URL</th>
<th>Site Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><a href="http://www.keycontent.org">http://www.keycontent.org</a></td>
<td>KeyContent.org</td>
<td>Completely customized theme with 4.x. You can read the details on my <a href="#">How Did They Do It</a> page.</td>
</tr>
<tr>
<td><a href="http://www.stc-carolina.org">http://www.stc-carolina.org</a></td>
<td>Carolina Communiqué</td>
<td>No image specified. One of the following parameters must be set: fileId, randomGalleryId, fgalId, attId, id, or src. Completely customized theme.</td>
</tr>
</tbody>
</table>
Did You Know....

Flash

Did you know that you can use Tiki's Flash plugin to embed more than flash movies? Lots of Web 2.0 widgets use Flash to deliver content.

For example, here's my Shelfari bookshelf:

This was created with the code:

```
{FLASH(movie="http://www.shelfari.com/ws/shelf.swf?username=XXXXXX",width=>325,height=>465,quality=>high)}{FLASH}
```

Tiki does Pandora, too. Here's what I'm listening to:

Facebook

Rick Sapir

Rick is on Facebook! Yeah, I know... so is everyone else, too. Oh well..
