Webinar 2013 02

- Recording
- When
- What
- Where
- Topics
  - 1st hour quick news
  - Second hour, longer topics
- Chat log
- Pages related to this one

Recording

- http://tiki.bigbluebutton.org/playback/slides/playback.html?meetingId=d55965849921585c1849af03b7a51638700d979-1361472957396

When

Thursday, February 21, 2013 at 19:00:00 UTC time (click for time zone in your city)

What

See Webinars for a detailed description.

Where

http://live.tiki.org

Topics

1st hour quick news

- Explain the rationale for the new Webinar format
- Should we ask for a conference call with SF about Migrate to Allura? (Jyhem will follow-up with SF)
- 2013-02-05: Pascal, Marc, Alain, Duane and Nick met Fred and the BBB Team in Ottawa. The upcoming version is looking very good. We agreed to organize a TikiFest BigBlueButton in June 2013, and make use of all the new features
- Quick report on TikiFestMuskoka
  - Introduce show.tiki.org
    - Karen asks: "quick question: do we still want the 'perpetual' showcase Tikis I've made available @ http://tikishow.kstingel.com? "
    - Until the new infra is ready, yes please.
- CKEditor4 has been added to trunk
- (add any topics here)
Second hour, longer topics

- Discussion about CKEditor4

Chat log

Karen Stingel: Hi Geoff, why do you want some audio loss? Geoff Brickell: It’s not because of the audio loss; it’s because I’m thinking about the difference between the audio and the video. What I want is a clear video signal, not necessarily a clear audio signal.

Karen Stingel: Ok, I’ll add to the list for later.

Marc Laporte: I have not seen any Allura problem so far recently.

Karen Stingel: Quick question: do we still want the 'perpetual' showcase Tikis I've made available at http://tikishow.kstingel.com?

Marc Laporte: Sounds good.

Karen Stingel: I don’t get the question, you have to recreate the bug on the test instance, but you still have to file a bug the usual way.

Karen Stingel: What’s the firing up of the instance should be pretty quick, 1 2 min.

Karen Stingel: Also, the whole bug reproduction process, whether release or not is not easy to do a lot of time.

Karen Stingel: My throat is really bad today.

Marc Laporte: True, I’ve been using a lot of voice to participate.

Karen Stingel: Nelson, sounds good from me.

Marc Laporte: I seem to be talking a lot, I think I have contact lenses for computers.

Karen Stingel: Good thinking there Marc, et al.

Marc Laporte: I’m not sure people can send mails to them.

Karen Stingel: Well, I thought quick way to create bug reproduce/test profile would be great, I’m trying to catch up to stay up-to-date at all his tiki instances managed. It’s not sure people can send mails to them.

Marc Laporte: I think they are not mailing lists, just aliases/forwarders distributed to several people.

Karen Stingel: By the way, why there is a Join/Leave button for Quality, Security and Legal team?

Marc Laporte: I think it’s just for convenience.

Karen Stingel: It seems that Flash is not working.

Marc Laporte: Chrome here too.

Karen Stingel: How many simultaneous "test instances" can be run?

Marc Laporte: My sites are permanent, so.

Karen Stingel: Guest: omstefanov: I have trunk, br6, br9 + br10 (andc later, br11) permanently available.

Marc Laporte: Would it be possible to push bug examples to tikishow.kstingel.com so we have a perpetual copy of them?

Karen Stingel: Open bugs?

Marc Laporte: Some automation like show.tiki.org would be awesome for sure.

Karen Stingel: Why do you also get some audio loss?

Marc Laporte: Well, I should have called my team.

Karen Stingel: Nelson, it seems like you are leaving in an hour.

Marc Laporte: I’m already here.

Karen Stingel: Nelson: I seem to be talking a lot, I think I have contact lenses for computers.

Marc Laporte: It seems that I’m the only one that works for the SF to disseminate Allura.

Marc Laporte: Let’s switch - relocate https://tikiwiki.sourceforge.net/tikiwiki/tikiwiki/branches/6.x

Marc Laporte: https://svn.code.sf.net/p/tikiwiki/code/branches/6.x.

Karen Stingel: I have http just use http.

Marc Laporte: But it is not asking me for sf password anymore anyway, just needed it to insert once and now it somehow remembers.

Karen Stingel: Several commits already and no ask for password.

Marc Laporte: I’m just updating some sites, you should not need commit access there.

Karen Stingel: It’s not asking for any password - it’s just checkout - one way.

Marc Laporte: I hope nobody uses IE6 anymore.

Marc Laporte: I seem to be talking a lot, I think I have contact lenses for computers.

Marc Laporte: Anybody here logged in to BBB with IE6 ? ;)

Karen Stingel: Does it ask for password access?

Marc Laporte: No commit access.

Marc Laporte: Why not get your heads together, Geoff with his experience and the Marc-Nelson-Pascal idea.

Marc Laporte: I thought quick way to create bug reproduce/test profile would be great.

Marc Laporte: Maybe try to refresh the test profile, but maybe it’s a bug.

Marc Laporte: The instance should be pretty quick, 1 2 min.

Marc Laporte: I still have to file a bug the usual way.

Marc Laporte: I will add to recreate the bug on the test instance.

Karen Stingel: Would it be possible to push bug examples to tikishow.kstingel.com so we have a perpetual copy of them?

Karen Stingel: Would a mail come "your instance is ready"?

Marc Laporte: No commit access, just have mailing lists, just aliases/forwarders distributed to several people.

Karen Stingel: If I’m the only one that works for the SF to disseminate Allura, why not get your heads together, Geoff with his experience and the Marc-Nelson-Pascal idea.

Marc Laporte: I thought quick way to create bug reproduce/test profile would be great.

Marc Laporte: I have trunk, br6, br9 + br10 (andc later, br11) permanently available.

Karen Stingel: Why not get your heads together, Geoff with his experience and the Marc-Nelson-Pascal idea.

Marc Laporte: I should have called my team.

Karen Stingel: I have http just use http.

Marc Laporte: I don’t get the question.

Karen Stingel: I have http just use http.

Marc Laporte: I don’t get the question.

Marc Laporte: I seem to be talking a lot, I think I have contact lenses for computers.

Marc Laporte: Marc Laporte: I don’t get the question.

Karen Stingel: Guest: omstefanov: I have trunk, br6, br9 + br10 (andc later, br11) permanently available.
examples are always available. Nelson: How are the different sites traced? Right Marc, do the tests run through the bug tracker?

Karen: The temp ones are demo.tiki.org and the real ones are tiki.org, and there are both trunk(1) and 10- I've almost completed moving all my production sites to 9.x. Nelson: I like to push a ready version, by say July, August or something. Karen: I'd like to push a version ready by say July, August or something.

Marc: I've almost been moving all my production sites to 9.x. Karen: I've almost completed moving all my production sites to 9.x.

Olaf: I have both trunk(1) and 10- I've almost completed moving all my production sites to 9.x. Nelson: a) testing is code testing. 2b) testing is code testing.

Karen: I've almost completed moving all my production sites to 9.x. Marc: I've almost completed moving all my production sites to 9.x. Nelson: I've almost completed moving all my production sites to 9.x.

Geoff: Do you have your test/control site in 9.x or in several versions (I thought I heard "tiki")? Marc: I've almost completed moving all my production sites to 9.x. Nelson: I've almost completed moving all my production sites to 9.x.

Karen: I've almost completed moving all my production sites to 9.x. Marc: I've almost completed moving all my production sites to 9.x.

Geoff: Do you have your test/control site in 9.x or in several versions (I thought I heard "tiki")? Marc: I've almost completed moving all my production sites to 9.x. Nelson: I've almost completed moving all my production sites to 9.x.

Karen: I've almost completed moving all my production sites to 9.x. Marc: I've almost completed moving all my production sites to 9.x. Nelson: I've almost completed moving all my production sites to 9.x.

Karen: I've almost completed moving all my production sites to 9.x. Marc: I've almost completed moving all my production sites to 9.x. Nelson: I've almost completed moving all my production sites to 9.x.

Geoff: Do you have your test/control site in 9.x or in several versions (I thought I heard "tiki")? Marc: I've almost completed moving all my production sites to 9.x. Nelson: I've almost completed moving all my production sites to 9.x.

Karen: I've almost completed moving all my production sites to 9.x. Marc: I've almost completed moving all my production sites to 9.x. Nelson: I've almost completed moving all my production sites to 9.x.
Marc Laporte: The current CKEditor 4 integration is based on the "Standard" download package. See http://ckeditor.com/blog/Intro-to-Customizing-CKEditor-4 for more info. One important passage: "The Standard package doesn't include plugins like Alignment, Font Size, Color and a few other typical buttons. Why? Because modern websites predefine those things in CSS to avoid low quality content. Users should not "play around" with formatting. Web standards are increasingly more focused on the semantic information of texts. The Standard CKEditor comes with all the necessary tools to create "good web content". The idea is teaching our users about the best way for a "better web", so we made Standard the default option."

Karen Stingel: luciash, I need html syntax in the database yes, could be more questions at install time ... or maybe so I don't miss anything lol

Marc Laporte: Pascal will create demo.tiki.org/wysiwyg-html/ and demo.tiki.org/wysiwyg-wiki/ and maybe demo.tiki.org/wysiwyg-jison-wiki/ so we can have a stable place to show off issues. We make more than one demo sites because the various modes are mutually exclusive and we need a place to show off issues for each.

Karen Stingel: that it is just not going to be fixed before tiki12?

Nelson: maybe the full version should be tried, instead of the "standard" download

Marc Laporte: The current CKEditor 4 integration is based on the "Standard" download package. See http://ckeditor.com/blog/Intro-to-Customizing-CKEditor-4 for more info. One important passage: "The Standard package doesn't include plugins like Alignment, Font Size, Color and a few other typical buttons. Why? Because modern websites predefine those things in CSS to avoid low quality content. Users should not "play around" with formatting. Web standards are increasingly more focused on the semantic information of texts. The Standard CKEditor comes with all the necessary tools to create "good web content".
