Webinar 2013 02

- Recording
- When
- What
- Where
- Topics
  - 1st hour quick news
  - Second hour, longer topics
- Chat log
- Pages related to this one

Recording

- http://tiki.bigbluebutton.org/playback/slides/playback.html?meetingId=d559965849921585c1849af03b7ac51638700d979-1361472957396

When

Thursday, February 21, 2013 at 19:00:00 UTC time (click for time zone in your city)

What

See Webinars for a detailed description.

Where

http://live.tiki.org

Topics

1st hour quick news

- Explain the rationale for the new Webinar format
- Should we ask for a conference call with SF about Migrate to Allura? (Jyhem will follow-up with SF)
- 2013-02-05: Pascal, Marc, Alain, Duane and Nick met Fred and the BBB Team in Ottawa. The upcoming version is looking very good. We agreed to organize a TikiFest BigBlueButton in June 2013, and make use of all the new features
- Quick report on TikiFestMuskoka
  - Introduce show.tiki.org
    - Karen asks: "quick question: do we still want the 'perpetual' showcase Tikis I've made available @ http://tikishow.kstingel.com?"
    - Until the new infra is ready, yes please.
- CKEditor4 has been added to trunk
- (add any topics here)
Discussion about CKEditor4

Chat log

Karen Stingel: Hi Geoff, nice to see you!
Geoff Brickell: Hi, yes all.
Karen Stingel: Hi Marc, nice to see you!
Marc Laporte: Hi, I'm in listening mode.
Karen Stingel: Marc, from Amsterdam.
Marc Laporte: Hello.
Karen Stingel: Ok, I will add to the list for later.
Karen Stingel: I have not seen any Allura problem so far recently.
Marc Laporte: http://tiki.org/ConsultingTeam#MarcLaporte
Karen Stingel: ok, I will add to the list for later.
Marc Laporte: Why there is no Join/Leave button for Quality, Security and Legal team?
Marc Laporte: +5
Geoff Brickell: Anybody here logged in to BBB with IE6 ?)
Geoff Brickell: Chrome here too.
Karen Stingel: Yes Geoff, since you are one of the more prominent consultants, esp across the atlantic would be great to have your
Geoff Brickell: Could really do with, a more up-to-date version of Tiki.
Marc Laporte: Anybody out there using either IE 5 or IE 6?
Geoff Brickell: I would like to see the "trunk" of Tiki, instead of all the "branches".
Geoff Brickell: A good example of a test environment.
Karen Stingel: I seem to be talking at a faster pace than usual.
Karen Stingel: I just turned up headphones.
Marc Laporte: I agree.
Marc Laporte: http://tiki.org/Teams
Marc Laporte: +1
Karen Stingel: And let's make sure the list remains short.
Marc Laporte: I like it, especially as I need to leave in an hour.
Karen Stingel: You only need https when accessing to commit fixes and stuff.
Karen Stingel: to update via SVN to a live server, you only need http access.
Marc Laporte: svn switch --relocate https://tikiwiki.svn.sourceforge.net/svnroot/tikiwiki/branches/6.x
Marc Laporte: http://tiki.org/show.tiki.org
Marc Laporte: Next.
Marc Laporte: "http://tikishow.kstingel.com/"
Marc Laporte: I have trunk, br6, br9 + br10 (andc later, br11) permanently avail.
Marc Laporte: Why not get your heads together, Geoff with his experience and the Marc-Nelson-Pascal idea
Marc Laporte: Marc and Nelson, I thought, but maybe it is not very easy.
Karen Stingel: will a mail come "your instance is ready"?
Geoff Brickell: No, I don't get the question.
Karen Stingel: At present, the show.tiki.org sites are temporary, so examples are lost... my sites are permanent, so
Karen Stingel: Allura change to "conflict of two features" bugs...
Marc Laporte: +1
Marc Laporte: Yes Geoff, since you are one of the more prominent consultants, esp across the atlantic would be great to have your
Marc Laporte:input and participation.
Karen Stingel: Quick question: do we still want the 'perpetual' showcase Tikis I've made available
Marc Laporte: @
Karen Stingel: http://tikishow.kstingel.com/
Karen Stingel: I have trunk, br6, br9 + br10 (andc later, br11) permanently avail.
Marc Laporte: What about morning Geoff? it's 5 AM tomorrow here
Karen Stingel: Hi everybody.
Marc Laporte: http://info.tiki.org/FeaturedTikis
Marc Laporte: Quick report on TikiFestMuskoka
Karen Stingel: Hi everybody.
Marc Laporte: http://tiki.org/AdminsTeam#Essentials
Marc Laporte: "It's not found?... and come up with a join show-site concept"
Marc Laporte: Why not get your heads together, Geoff with his experience and the Marc-Nelson-Pascal idea
Marc Laporte: Marc and Nelson, I thought, but maybe it is not very easy.
Karen Stingel: will a mail come "your instance is ready"?
Marc Laporte: +5
Marc Laporte: "...your instance is ready".
examples are always available.

Karen: we do not use all Zend stuff but several libs, yes, but I'm not sure which ones.

Karen: well there was always full Zend package, but now it is handled by the composer, maybe it includes.

Marc: I can't hear, Jonny yet.

Marc: +1 from me too.

Karen: we do not use all Zend package but several libs, yes, but I'm not sure which ones.

Marc: maybe show.tiki.org is used for that.

Karen: Of course Alain's knowledge is more at the higher level, but he can help with creating tests cases and so on, so long as someone else sets up the infrastructure.

Karen: Great to have you back Marc!

Marc: One thing that could really help with better testing sites is an easier ways to copy pages, or even whole groups of pages from a prod to a dev site and back.

Marc: I think there will be some action on the testing front to have testing...

Marc: +1 from me too.

Marc: I would like to push and get the infrastructure ready by say July/August or something.

Marc: Do you have your test/control site in 9.x or in several versions (I thought I heard "trunk")?

Marc: do you have your test/control site in 9.x or in several versions (I thought I heard "trunk")?

Marc: Yes, I do think.

Marc: Stephane, is there a plan to use it as part of the tiki 11 release process.

Marc: Yes.

Marc: We have both trunk(11) and 10, - I've almost completed moving my production sites to 9.

Marc: Yeah.

Marc: I think that this is a front-end testing.

Marc: what is a typical test workflow? does it test only code/syntax errors? or can it catch security holes, or is it just to check code?

Karen: I think there was a plan to contribute your 9.x set right.

Karen: It doesn't seem to be here...but I've noticed that the 'vendor' folder after installing Tiki-trunk seems to have more files.

Karen: is CKEditor planned to be added to composer.json, or left as a svn external?

Marc: Then we will have the full Zend package, or would just the librqay be better?

Karen: +1 for Karen: if we can't use all Zend package, but now it is handled by the composer, maybe it includes.
Marc Laporte: The current CKEditor 4 integration is based on the "Standard" download package. See http://ckeditor.com/blog/Intro-to-Customizing-CKEditor-4 for more info. One important passage: "The Standard package doesn't include plugins like Alignment, Font Size, Color and a few other typical buttons. Why? Because modern websites predefine those things in CSS to avoid low quality content. Users should not "play around" with formatting. Web standards are increasingly more focused on the semantic information of texts. The Standard CKEditor comes with all the necessary tools to create "good web content". The idea is teaching our users about the best way for a "better web", so we made Standard the default option."

Karen Stingel: I'm in process of mapping Zend libs used for adopting zf2

Marc Laporte: nice, looks like there is a ton of code there everyone is doing and bik in a sec

Karen Stingel: we do not have even the tiki 11 star name yet ;)

Marc Laporte: what is it going to be? We just shift the months cycle?

Karen Stingel: if you can, I'm trying to figure out what's going to be used, and what's that already there?

Marc Laporte: ok, so do we have one web application and one of CKEditor? does it make sense?

Karen Stingel: luci...: I just check that once I get back ... I'm also trying to track any reported conflicts introduced via composer ...

Marc Laporte: what about demo.tiki.org/wysiwyg-jison-html ?

Karen Stingel: no do we have something special or basicaly tiki syntax version of http://ckeditor.com/demo#bbcode ?

Marc Laporte: is it going to be fixed before tiki12?

Karen Stingel: for the "Use Wiki syntax in Wysiwyg"... I like that, why not ?

Marc Laporte: maybe, but I was looking for a WYSIWYG system, when I first tried Tiki I always reduce the number of buttons problem solved

Karen Stingel: luciaash: doesn't work when I'm mirroring SVNtiki to DEVtiki webroot

Marc Laporte: Pascal will create demo.tiki.org/wysiwyg-html/ and demo.tiki.org/wysiwyg-wiki/ and maybe demo.tiki.org/wysiwyg-jison-wiki/ so we can have a stable place to show off issues. We make more than one demo sites because the various modes are mutually exclusive, and we need a place to show off issues for each.

Karen Stingel: luciaash: that sounds too specific... we should promote Wiki mode first maybe ;)

Marc Laporte: luciaash: I'll check that once I get back ... I'm also trying to track any reported conflicts introduced via composer ...

Karen Stingel: luciaash: I'll check that once I get back ... I'm also trying to track any reported conflicts introduced via composer ...

Marc Laporte: luciaash: I know code prefs http://doc.tiki.org/System+Configuration

Karen Stingel: luciaash: it seems there is a bit of self-indulgence http://tiki.org/blogpost553-Wysiwyg-Editor-Keyboard-Shortcuts-Did-You-Know

Marc Laporte: luciaash: nice, thanks Luci! X

Karen Stingel: luciaash: makes sense to use

Marc Laporte: why about a question at install time? Wysiwyg or wiki mode editor as default?

Karen Stingel: luciaash: that sounds too specific - we should promote Wiki mode first maybe ;)

Marc Laporte: luciaash: it is just not going to be fixed before tiki12?

Karen Stingel: luciaash: I'll check that once I get back ... I'm also trying to track any reported conflicts introduced via composer ...

Marc Laporte: Pascal will create demo.tiki.org/wysiwyg-html/ and demo.tiki.org/wysiwyg-wiki/ and maybe demo.tiki.org/wysiwyg-jison-wiki/ so we can have a stable place to show off issues.
