luciahs d' being (luci): ok
Marc Laporte (marclaporte): Sorry, I had audio problem. Is there a plan to finish the things from https://dev.tiki.org/Tiki12?

Bernard Sfez (Bsfez): let's
Marc Laporte (marclaporte): Because those are things we said we can live without for 12.0, but that were supposed to be done for 12.1
luciahs d' being (luci): my votes are there ;-

Torsten Fabricius (Torsten): Hello Torsten here ... I am back from hospital since a few hours and back from the doctor since a few minutes ... I restart my computer, connecting headset and come back here .. brb
Bernard Sfez (Bsfez): Hey Torsten hope you fell better !
luciash d' being (luci): Q: should we switch in defaults from jQuery-UI flick theme to "None" since I added the matching jQuery-UI styles to Fivealive in 12 ?
luciash d' being (luci): wb Torsten ! great !
Bernard Sfez (Bsfez): soon, Xavi, soon ! :) 
luciash d' being (luci): great job, xavi ! only thing i don’t like is the mixup of the icons ;-)
luciash d' being (luci): :D
Nelson (koth): I really like all this too, the only suggestion I have is to instead of having "useful profiles 1-2-3" "demo profile 1-2-3" to have the different pages to have more descriptive names, like, menu enhancements, or feature prototypes
luciash d' being (luci): +1 Nelson
Bernard Sfez (Bsfez): yes let's wait for Xavi to finish then lets talk :D
Jonny Bradley (jonnynbradley): :)
luciash d' being (luci): /me shuts up and forgets everything he wanted to point out or ask :)

Xavi (xavi): thks
Jean-Marc Libs (Jyhem): Great work \o/
Bernard Sfez (Bsfez): GREAT WORK
Xavi (xavi): re: http://dev.tiki.org/Profiles+Wizard
Torsten Fabricius (Torsten): hello everybody
luciash d' being (luci): i think it would help a lot if there were screenshorts before applying the profile
luciash d' being (luci): to get an idea what the user gets by applying the profile
Jonny Bradley (jonnynbradley): +1 for screenies
Torsten Fabricius (Torsten): +1
Jonny Bradley (jonnynbradley): i like the layout - few per page, makes it look like a brochure
Jonny Bradley (jonnynbradley): would be better with more pictures
Bernard Sfez (Bsfez): you are too loud...
Bernard Sfez (Bsfez): :0
Bernard Sfez (Bsfez): Xavi you are too close to your Mic
luciash d' being (luci): isn’t the Server Fitness too late when Tiki already installed ?
Jonny Bradley (jonnynbradley): /me thinks Xavi is excited about profiles
Bernard Sfez (Bsfez): thanks
Bernard Sfez (Bsfez): :)
luciash d' being (luci): /me is excited too :) 
Bernard Sfez (Bsfez): +1 better
Bernard Sfez (Bsfez): totally agree great work...
Bernard Sfez (Bsfez): the idea to have better name is to have less explanation about what it does
Bernard Sfez (Bsfez): I'll be glad to help ! (i have very good hebrew name)
Jean-Marc Libs (Jyhem): Please post this page's url
Jonny Bradley (jonnynbradley): Shopping Cart was called TikiKart for several years - kept everyone away! (except Arild and Xavi eventually ;)
luciash d' being (luci): what, u have not tried the TikiKart racing yet?
Jonny Bradley (jonnybradley): :) 
Jonny Bradley (jonnybradley): i always tell my users they are "macros"
luciahs d' being (luci): I did not read that yet, tru
luciahs d' being (luci): too long :)
Bernard Sfez (Bsfez): +1 
Jonny Bradley (jonnybradley): maybe we need a new video? 
Jean-Marc Libs (Jyhem): macros is very much what they do 
Nelson (koth): I think going forward, maybe Tiki 14, we might want to discuss calling profiles "configuration templates" or something.... Might be worth the effort 
Xavi (xavi): I agree Nelson 
Jonny Bradley (jonnybradley): after 12.1 right? 
Bernard Sfez (Bsfez): again clap clap clap !
luciahs d' being (luci): i tell them "preconfigurations" 
Bernard Sfez (Bsfez): We should simply check how "the others" name it and improve :)
Bernard Sfez (Bsfez): those screen are KISS (Keep It Simple Stupid) I like it :)
luciahs d' being (luci): i fear the others call them everything but not the same every time 
Bernard Sfez (Bsfez): for sure ! That's why i say "we improve" not copy 
Jean-Marc Libs (Jyhem): Some call them themes :) but it's not the same 
Bernard Sfez (Bsfez): no no :)
luciahs d' being (luci): who decides what extra fields should be there by default ? 
Bernard Sfez (Bsfez): ? Xavi this is not for users right ? (user wizard ?) 
luciahs d' being (luci): yes, user wizard is for users 
Bernard Sfez (Bsfez): what we see is for sers ? 
Bernard Sfez (Bsfez): group setting ? 
Nelson (koth): Bernard, the user wizard is for users to fill in info abt themselves. As shown now, what fields are shown from the user tracker is defined in the admin...groups page 
luciahs d' being (luci): only the first screen 
Bernard Sfez (Bsfez): ah ! :D 
luciahs d' being (luci): these are for admins how to set it up i think 
Nelson (koth): yes, xavi is showing the admin setup steps 
luciahs d' being (luci): by default you see the same without the extra fields ? (SkypeID, etc.) 
Jonny Bradley (jonnybradley): any new tiki admin should watch this recording, well done & thanks again Xavi! :) 
Jonny Bradley (jonnybradley): one thought - does the "User Details" step take it's name from the tracker? (would be possible ;)
luciahs d' being (luci): it is by default showing for first login, right ? 
Arild Berg (arild): thanks Xavi :-) 
Jonny Bradley (jonnybradley): +1, yay for Arild! 
Arild Berg (arild): The updates look great! 
Bernard Sfez (Bsfez): really gret improvement tks you both 
Torsten Fabricius (Torsten): thx!! 
Torsten Fabricius (Torsten): just to say: I have news for the TikiFestDevOps / TikiFestGermany2014 
Jean-Marc Libs (Jyhem): I like it also 
Torsten Fabricius (Torsten): when this fits to the schedule, just say 
Xavi (xavi): jonnyb: not right now, but please feel free to improve that way to create the "User Details" 
Jonny Bradley (jonnybradley): will do (when next in trunk) 
Xavi (xavi): http://mother.tiki.org 
Bernard Sfez (Bsfez): who is 5148300000 ? Marc ?

Xavi (xavi): & http://doc.tiki.org/Connect+Settings
Xavi (xavi): and more things to be documented
Xavi (xavi): :-D
Jonny Bradley (jonnybradley): data should be separate enough, but still should stay on trunk imho
Xavi (xavi): ok, I'm fine with trunk for mother.tiki.org
Jonny Bradley (jonnybradley): by the way, i called it "mother" because Big Mother is watching;
Xavi (xavi): thks Marc!
Xavi (xavi): Big Watcher! :-)
Xavi (xavi): ok, thanks Nelson for a demo on those new features

Xavi (xavi): in & out worked for me
lucia d' being (luci): now i see it too
lucia d' being (luci): what is it about ?

patrick.proulx: ya, notifications
Jean-Marc Libs (Jyhem): ok, I see it

Jean-Marc Libs (Jyhem): :)
lucia d' being (luci): very neat anyway
Jonny Bradley (jonnybradley): brilliant! (but might not "urgent" be better than critical?)
Xavi (xavi): yep
lucia d' being (luci): would it be possible to "save my search query" to list later what i searched for ?
Jonny Bradley (jonnybradley): which features are covered so far?
Jean-Marc Libs (Jyhem): Watches are tuned to each feature
Jean-Marc Libs (Jyhem): Not to mention group watches and such
Xavi (xavi): Re: http://doc.tiki.org/Watch#Types_of_watches

Xavi (xavi): yep, congrats Nelson (and LPH :-)
Jean-Marc Libs (Jyhem): yes, really something I'd want to use

Jonny Bradley (jonnybradley): and autocomplete :)
