

Advisory Board

This is an idea for the future.

We could set up an Advisory board

Who

These people are from outside the community. They are individuals with a history and credibility in our field (ex.: [Dirk Riehle](#) or [Karl Fogel](#))

What

They provide advice but do not participate in the day to day activities

Why

- We want their advice, contacts and credibility
- They want to help a project which they feel is important

Logistics

- There would be 2 to 4 meetings per year
- Most of the what happens at Tiki is public. But there a few aspects (legal, financial and partnerships) that are not. The advisory board will have access to everything.
