Has been reported to work well on WinXP with Tikiwiki 1.8.5

As of Nov. 9, 2010 — just installed TikiWiki 5.3 on Apache2Triad on my XP SP3 machine. A2T is running:
Apache 2.2
MySQL 5.0.18
PHP 5.1.2

It required addition of

    extension=php_pdo_mysql.dll
to php.ini in the Windows directory.
