[luci - 09:14:01 PM] i am pretty sure i didn't do that myself :-p
[Pascal St-Jean - 03:13:39 PM] yes because I've seen high quality
[Pascal St-Jean - 03:14:13 PM] Nelson will be brining a WebCam

[Pascal St-Jean - 03:27:42 PM] don't know
[Pascal St-Jean - 03:27:50 PM] they are still trying to iron out many bugs
[Pascal St-Jean - 03:28:00 PM] they haven't release official V1.0 yet
[Pascal St-Jean - 03:28:13 PM] this is why they are excited for our feedback
[luci - 09:28:49 PM] i see
[Pascal St-Jean - 03:28:23 PM] but I still felt this is a better way to Broadcast then UStream or

Skkype
[luci - 09:29:13 PM] i wondered i never heard about this soft before
[Pascal St-Jean - 03:28:47 PM] 😃
[luci - 09:29:21 PM] sure
[luci - 09:29:43 PM] recording option as with ustreab would e nice though
[luci - 09:29:48 PM] ustream
[luci - 09:32:00 PM] strange, i tried the mic option, dialog to allow/deny appears but even i do not allow or deny i am already appearing in the voice participants
[luci - 09:32:13 PM] and even when i denied i stay there
[Pascal St-Jean - 03:31:52 PM] hey guys
[Pascal St-Jean - 03:31:59 PM] I'm going to share my screen to show the error

[Pascal St-Jean - 03:33:03 PM] can't get Trunk up and runnig
[Pascal St-Jean - 03:33:09 PM] but Tiki 3.3 not problem
[Pascal St-Jean - 03:33:15 PM] or any branch for that matter
[luci - 09:33:57 PM] i think it is windows related, never saw that one
[luci - 09:34:13 PM] or is it linux ?
[Pascal St-Jean - 03:33:52 PM] no running on Ubuntu
[luci - 09:34:47 PM] fresh install on fresh db ?

[luci - 09:35:37 PM] can you check in db/local.php ?
[Pascal St-Jean - 03:38:26 PM] others just arrived
[luci - 09:40:45 PM] you have to open it as a file
[luci - 09:40:51 PM] not in browser ;)
[Pascal St-Jean - 03:40:18 PM] yes
[Pascal St-Jean - 03:41:42 PM] $db_tiki='mysqli';
[luci - 09:42:16 PM] okay
[Pascal St-Jean - 03:41:57 PM] I guess I still have screen sharing
[luci - 09:42:33 PM] that is the same as here
[Pascal St-Jean - 03:42:04 PM] ok
[luci - 09:42:41 PM] yes, you guess right 😃
[Pascal St-Jean - 03:42:14 PM] 😃
[Pascal St-Jean - 03:42:40 PM] ok well I'll intall branch
[Pascal St-Jean - 03:42:44 PM] then upgrade the database
[luci - 09:43:21 PM] googled that error what it means ?
[Pascal St-Jean - 03:42:51 PM] see if that works

[luci - 09:46:31 PM] oh, now it even doesn't ask me to allow mic

[luci - 09:47:23 PM] Pascal: hmm, so are you running mysql on your localhost ?
[Pascal St-Jean - 03:46:56 PM] yes
[Pascal St-Jean - 03:46:58 PM] also online

[luci - 09:48:01 PM] weird, do you have php-pdo or adodb ?
[Xavi - 09:49:54 PM] testing....
[Xavi - 09:50:27 PM] yep, desktop sharing still works even with those udated packages, if using kazehakase
[luci - 09:56:51 PM] Xavi: if I am supposed to hear somethng from you in the voice chat, i don't
[luci - 09:57:32 PM] hi Nelson !
[Nelson - 03:58:34 PM] Hi

[luci - 10:11:16 PM] are you watching TV there ?
[Xavi - 10:11:30 PM] yes, a documentary
[luci - 10:11:39 PM] muting your mic is better choice than muting your voice in voice participants
[Xavi - 10:11:54 PM] ok
[Xavi - 10:11:56 PM] 😃
[luci - 10:12:05 PM] i mean mute it in your volume controls rather to prevent surprising results ;)

[TikiFest Broadcast - 07:07:17 PM] so Nelson found the solution
[TikiFest Broadcast - 07:07:41 PM] I had to enter 127.0.0.1
[TikiFest Broadcast - 07:07:45 PM] instead of Localhost
[TikiFest Broadcast - 07:07:52 PM] we think it may be because of the Virtual Machine
[TikiFest Broadcast - 07:08:01 PM] but the funny thing is that Branch works fine
[luci - 01:19:36 AM] ah, right, maybe Tiki 3 does the paths differently
[luci - 01:19:51 AM] localhost with lower L wouldn't help ?
[TikiFest Broadcast - 07:21:51 PM] sorry, typo. I don't use uppercase
[luci - 01:22:38 AM] ah, ok
