CommentDoc

This page has been moved to Comments

-
User Documentation

Comments can be used in:

- Articles
- Wiki pages
- Blogs
- Blog posts
- Image galleries
- File galleries
- Polls

If you enable comments for some of the features of Tiki from the admin menu you will see links to show/hide comments and the number of comments for the object being viewed. In this section we'll explain comments for Tiki pages, everything will be the same for other Tiki features such as articles, weblogs, polls, etc.

If you see this bar at the bottom of the central part of the screen (or somewhere else if the customization changed the appearance) then you can see/enter comments. Click the Show comments link to display comments and a form to post new comments (if you have the permission).

Controlling the display of comments

insert graphic

You can see here the comments panel, you can enter a new comment, set which comments you want displayed and see the comments. To get started enter some comment.

insert graphic

The toolbar at the top can be used to configure how many comments to display per page, how comments will be sorted (Score/Date), the minimum number of points for a comment to be displayed, the minimum score for a comment to be displayed (threshold) and a find box to filter comments containing some word. The *Top* link can be used to get back to first page of comments from any page of comments. The *Hide all* link can be used to quickly hide all the comments (it restores the default hidden state of comzone when *comzone=show* was previously requested from post/get, url or cookie to keep comments displayed). If you reply to a comment, replies will be displayed nested to the comment as in the following screen:

insert graphic

Clicking any of the replies will take you to a page where replies for the comment are displayed and you can enter a new reply or reply an existing reply.

If you are admin or the comment was entered by you as a registered user (not anonymous) you will be able to remove a comment after posting it if you didn't meant to post that comment or if you made some mistake.

Permissions

The following permissions control the comment system:
