Status/RoadMap

Major News Flash

There is a great opportunity for Tiki to get an "already integrated" DMS that we can basically drop in as a replacement for the File Gallery. This DMS was written by [Gary Clift](#) and I have it up and running on [my test site](#).

Wishlist

- document viewers (view word & excel via web page)
 - <http://wwwware.sourceforge.net/>
 - <http://chicago.sourceforge.net/xlhtml/>
 - search engine searches within word/excel/pdf docs
- file versioning (WebDAV?)
 - [Subversion](#) enhanced-CVS versioning?
 - [Subversion WebDAV](#) exists, and an Apache module for it. I saw a suggestion for URL remapping to store Tiki files within Subversion.
 - This [Wiki tech page](#) comments that Subversion does not support full Delta-V versioning.
 - [Catacomb](#) is a Delta-V versioning tool.
- easy integration with GalaxiaWorkflow
- Authena integration (see below)

TikiTeam

- Elliott))McGucken((is working on integrating [Authena](#) with Tiki. Authena integrates [creative commons licenses](#) and [Dublin Core metadata](#). (inactive)
- [Dennis Heltzel](#) (inactive)
- [Gary's home page](#) (inactive)
