

## Dogfood Team Release

1. Determine an upgrade calendar for all relevant [domains](#), from less risky to most risky. Order is Branding, Themes, Documentation, Community (tiki.org), Development, Profiles. It's the ultimate [DogFood](#) and the goal is that all major sites are upgraded before it's released.
2. In collaboration with the [Infrastructure Team](#), proceed to these upgrades and ensure everything is still working fine.
3. After the upgrade, implement new features on \*.tiki.org to help test and make the community more open efficient and welcoming
  - In the weeks and months before an upgrade, this can be tested daily thanks to the [Pre-Dogfood Server](#)
  - Update [Dogfood](#) with any new features used. This serves as a case study.
4. Review [Tiki Welcome](#), as all new registrants are sent to it after validating their email link.
