Welkom bij Tikiwiki !

Tiki CMS/Groupware, ook bekend als Tikiwiki, is een krachtig web-gebaseerd Groupware en Content Management System (CMS), dat gebruik maakt van [PHP](#), [ADODB](#) en [smarty](#). Het kan worden gebruikt om allerlei vormen van Webapplicaties te maken, Sites, Portals, Intranets en Extranets. Er kan bijvoorbeeld ook een GeoCMS (Geospatial Content Management System) mee gemaakt worden. Het wordt ontwikkeld door een groot aantal deelnemers die de Tikiwiki Community vormen.

Deze website bevat een gedeelte van de activiteit van deze community.

Kijk ook eens bij de recente documentatie bijdrage op <http://doc.tiki.org>, bekijk de TikiMovies, en kijk rond in Help. Deze website is erg groot, een beetje 'open' en vrijblijvend in zijn samenwerkings verband, dus wees niet verbaasd over de diversiteit van de 1500 wiki pagina's die hier te vinden zijn.

Tips:

Op de ... dochter-site van tiki.org kunt u overigens ook in contact komen met de **nederlandstalige** Tiki gemeenschap. Iedereen is van harte welkom!

Tiki's beveiliging is belangrijk voor ons:: Lees TikiSecurity en help mee om Tiki nog beter te beveiligen.

Tiki Project Welcomes New Administrators

Author: Gary Cunningham-Lee - Published 08 Apr 2022 06:31 GMT-0000

Tiki Wiki CMS Groupware is an organic self-governing project that does things "the wiki way" and, in this spirit, when it's time to find people to join the group of project administrators, we draw from the community or active participants who can contribute time and effort to help with the guidance and direction of the project.

At this time, the [Admin Group](#) of the [Tiki Software Community Association](#) is pleased to announce the addition of two new members, Habiba Shahbaz and Roberto Kirschbaum. Habiba is bringing her unique skillset to keep the wheels of project administration turning smoothly, and Roberto has been actively contributing his coding skills, managing releases, and participating in community meetings. We are very pleased to make this announcement, and thanks again to the new admins for joining as we look forward to a great 2022.

Another administration change to announce is that Bilal Siddiq has resigned from the administrators group

to devote more time to his other pursuits. We thank Bilal for his time in the group and wish him the best.

Tiki 24 LTS Released

Author: Gary Cunningham-Lee - Published 15 Mar 2022 11:08 GMT-0000

 After several months of hard work, the latest long-term support version, Tiki 24, has been released. This version of Tiki Wiki CMS Groupware, which benefited from EvoluData's junior developer sponsorship program for a more coordinated approach to bug fixing, includes significant new features and numerous bug fixes and security enhancements. We are pleased to make Tiki 24.0 available at this time. Regular feature support will be provided for Tiki 24 via point releases until at least March 2024, and security updates until the end of the version's service life in March 2027. See the timeline on [Versions](#).
