RFEs for the Tracker system

- Why not use the tikiwiki tracker instead of sourceforge for RFEs and Bugs? That would easily show what needs to be done to make the tracker usable and more widely accepted.
-
- Enable watches for Trackers as in the Wiki
-
- Enable Wiki syntax in Trackers
-
- Reorder columns of Tracker items, this is listed on sourceforge as an open RFE

-
- Extend the Wiki syntax to allow entry of tracker fields. e.g. I want to users to be able submit information using wiki pages
