ImageGallery

General Description

Tiki image galleries only support

- jpeg
- png (won't be thumnailed)
- gif with Imagick or GD 2.0.28+

Much of the functionality of the galleries depends on the options set in GD or imagemagick.

Image galleries are collections of images. Users can create galleries and upload images to private or public galleries. You can select the number of thumbnails to appear in gallery rows/files as well as the thumbnail's size. Thumbnails are automatically created by Tiki; you don t have to upload them. Galleries can be used for albums, stories, showrooms, and many other applications.

Key Function and sub-features

Store images, and show images. Also can use it to store images which can be used in wiki or artikcle's or some other place.

Typical Uses

Gallery of pictures of community members.
