

Improving pages using Tiki websites performance from Google Search

What

We have every month statistics from Google Search services but we are not able allocate resources to analyse those results.

We receive a summary of the top 3 visited page for each domain and we should to take advantage of this "selection" of pages to review them and be sure our most visited pages are giving some benefit to our community.

When

We receives every month a notification by mail at admin@tikiwiki.org

Where

This page

Who

- Please join the effort!

How

First checking if it is viable (time and resources it requires) to:

- Log the output from Google (3 top search) here
- Review the pages
- Improve the existing content
- Add "profitable" exit pages (links)
 - Be sure someone getting visiting this page can navigate to more general and informative pages
- Log the changes here

Pages and actions

Review refer to overall feeling about the page and the content
