

LinuxTag2005

22. bis 25. Juni 2005 Kongresszentrum Karlsruhe

One of the major Open Source events in Europe

Who will be there from tw staff: **I have free tickets ... if you want some, please mail me or irc (toggg)**

- [amette](#)
- [toggg](#)
- you

please, fill in your name and page link

We try to organize something, any ideas ?

We are in the process of registering for a talk at the [Oscom-Conference 2005](#) on 22. june:

amette

Thinking of giving a talk about "The world as a bunch of open communities"

This idea was diminished by ordnas on #oscom

Although they don't want to have CMS-specific talks, they want to have tech-centered talks!

toggg

I hope to give a talk about PEAR's wiki interpreter, see WikiParser

A talk subject perhaps:

... err ... no more, anyway I will have the stuff ready, **any weapon, somebody ?**

Free the CMSs !

- be independant of DB drivers
 - the "burned in" approach as adoDB (tikiwiki, tikipro, ...)
 - PEAR's MDB2 (jaws, ...): SQL based on XML definitions
 - other approaches
- be independant of the wiki syntax
 - PEAR's TextWiki: a converter example
 - wysiwig trend
 - HTML but safe

Any other ideas?

The active discussion goes on on IRC's freeNode.net

-
- #whatYouWant (Hmmm...)

official OSCOM's **#oscom**

or alternatively

- #tikiwiki
- #tikiwiki-de
