

LoggedIn

For getting LoggedIn, you have to take some steps to BeRegisteredFirst.

After the registration process, you may either have already logged into a tiki, but you will also have a username and password pair at your disposal for logging into the particular Tikiwiki system later on again.

To be logged in fill the LoginBox with your UserName and UserPassword.

Try it out

[tiki-login_scr.php](#)

Notes

If a feature depends on the LoggedIn status, it will be easy to reference.
