

# PluginJS

Insert a javascript file and/or some javascript code in a wiki page

```
{JS(file=file.js)}javascript code{JS}
```

example: `{JS()}document.write("hello"){JS} {JS(file=tiki.js)}{JS}` (the tiki.js file is in this case in the tikiwiki root

This plugin can be found in the [mods](#). The source can also be found on the [sourceforge files](#) and copy in the directory lib/wiki-plugins
