

Quiz: True and False Questions

The interface for creating a boolean type of quiz. The user will type the question in the field

```
<input style="font-size: 15px;" size="80" name="description" value="This is a longer text box and you'd type a question like Is this child happy?"><br>
```

upload file

```
<input type="submit" name="grill" value="browse to attach an image/ sound/ movie file">
```

Reference URL:<input style="font-size: 15px;" input size="80" name="description" value="Reference URL">

```

```

and then select the correct answer

```
<input name="Englishquizq_" type="radio">Yes<br> <input name="G02RadioInp1" type="radio">No<br>
```

This test question applies to category:

```
<select name="category_id">
```

```
<option value="1"> Math</option>
```

```
<option value="2">Freshman Science</option>
```

```
<option value="3"> English Grammar</option>
```

```
<option value="4">101</option>
```

```
<option value="5"> 102</option>
```

```
<option value="6">103</option>
```

```
</select>Select the best category for this question<br>
```

This test question applies to class: (this would access the list of classes available once created)

```
<select name="category_id">
```

```
<option value="1"> x</option>
```

```
<option value="2"> y</option>
```

```
<option value="3"> z</option>
```

```
<option value="4">101</option>
```

```
<option value="5"> 102</option>
```

```
<option value="6">103</option>
```

```
</select>Select the class for this question<br>
```

This test question addresses International Teaching Standard:

```
<select name="category_id">
```

```
<option value="1">standard x</option>
```

```
<option value="2">standard y</option>
```

```
<option value="3">standard z</option>
```

```
<option value="4">standard 101</option>
```

```
<option value="5">standard 102</option>
```

```
<option value="6">California Teaching Standard</option>
```

```
</select>Select the appropriate standard for this question<br>
```

Test taker options

Do you want test takers to justify answers? (default yes)

<input name="Englishquizq_" type="radio">Yes
<input name="G02Radiolnp1" type="radio">No

Do you want test takers to rate question difficulty? (default yes)

<input name="Englishquizq_" type="radio">Yes
<input name="G02Radiolnp1" type="radio">No

Can students proceed without rating question? (default no)

<input name="Englishquizq_" type="radio">Yes
<input name="G02Radiolnp1" type="radio">No

Can students proceed without justifying answer? (default no)

<input name="Englishquizq_" type="radio">Yes
<input name="G02Radiolnp1" type="radio">No

These preferences above should be saved into a test creator profile so that there can be typed tests or quizzes as test takers advance through knowledge and mastery layers.

The idea is that the test taker shouldn't be so passive in their reviewing of the test. The output of their results as well as their justification and ratings of the question will help better assess their knowledge levels. I need to work up a screen showing the output after the test taker is done.

<input type="submit" name="grill" value="when you are done click here, preview">

Whereupon the test creator will be able to preview their new question and the edit screen for the question!

user view:

User Name you have X number of questions left.
