## Upgrade instructions

Those on [ReleaseNotes181](#) are the best available.

## Changes since 1.7.8

### Fixes

- Added exit to all header events to prevent further execution of code. [Damian](#)
- Added a check on image extension in wiki pictures to avoid php injection (see [art97](#) with details) [mose](#)

### Other

- Removed the XHTML bottom button because it's just a rant that is not strictly exact. [mose](#)

## Bugs known to have been introduced

None
