ReleaseProcess19rc2
Release 1.9 rc2

Table of contents

Was released 28 June 2004 and is available from SourceForge

Fixed

- tiki-install.php spits out many "variable undefined" errors (terence)
- Restoration of Forum moderator controls (rlpowell)
- Replies to replies to forum topics are hidden when viewing forum topics (rlpowell)
- Blogs posts appear when posted instead of at session expiry (damian)
- fixed an overlap problem with moreneat and IE (mose, oliver, marc)

Changed

- Removed avatars and packaged seperately available from http://mods.tiki.org/project6 (damian)
  Warning : This may confuse your users that already chose one of those avatars

Enhanced / Added

- Countless usability/user interface improvements like:
    - cross-linking in Admin pages to ease navigation
    - action feedback/confirmation messages (aka TikiFeedback)
    - less ambiguity in pages that handle both object creation and editing/removal
- Make help tips optional with the $feature_help (damian)
- Improved damian.css even more making right hand modules a different colour! (damian)
- added score events to wiki edit page (damian)
- score internals were refactored and all events listed in Score admin are being scored
- new plugin THUMB for displaying images in wiki pages (mose)
- upgraded smarty to 2.6.3. see http://smarty.php.net/misc/NEWS external link for changelog (mose)
- translation formatting if enabled (damian)
- Text changed in admin area as application menu can be anywhere (damian)
- Moved search stats to sit with fulltext option on admin search page (damian)
- Reworked the Actions boxes of galleries so that delete is rightmost for better slippymouse click

protection wink (damian)
- upgraded adodb from 4.05 to 4.23 (mose)
- ongoing german translation (ohertel)
- reactivate Hide anonymous-only modules from registered users

Known Bugs

- Seems that edit warning is sticking even when saved.

Screen grab

Bad handling of css in InternetExplorer

Poor space handling of Reply button for comments
