

ReleaseProcess19rc3

Tiki 1.9RC3.1 is available since 2004-12-14 and fixes a security problem in RC3.

Tiki 1.9RC3 is available since 2004-09-08.

Release 1.9 rc3

known bugs

- Resolve licensing issues: License
 - Wikigraph plugin should be moved to mods
 - need rewriting : lib/pear/Date.php
 - need replacement : lib/pear/NNTP.php
 - lib/pear/Net/Socket.php
 - TikiSheet licence cleaning (lib/sheet/ole*)
 - lib/webmail/htmlMimeMail.php has to be rewritten
- Built it TPL editor removed Javascript from the Templates
- Reply to a reply in the forum, makes the post your replying to seem like a top level topic post
- When replying to a forum post, form is no longer pre-filled (feature? annoyance? make optional?)
- ticketlib confirmation screens are messed up: the table doesn't take up 100% of the page width
- TikiSheet doesnt work on multi-tiki
 - Are the nasty libraries staying too? or at least can they get translated into english?

half way fixed:

- Security
 - RSS feeds: only those data visible to a user (wiki, forums etc.) can be seen in rss feeds, others are excluded now (ohertel): [993129: Forums RSS provides access to "restricted" forums](#), [852382: RSS feeds bypass all ACLs](#)

Bugs Fixed

- Submit and article via tiki-edit_submission.php and expiry date is one year from now. (OK). Then, edit this same article with tiki-edit_article.php and the expiry date become today. (so the article disappears). **Fixed in Branch-1-8 by roysinn**
