[Thursday, April 20, 2023 at 13:00:00 UTC time](#) (click to check time zone in your location)

The time is now:

Time in your timezone (when this page was last reloaded): Friday 10 May 2024 07:15:38 UTC

Where

- <https://live.tiki.org>

What

See [Roundtable Meetings](#) for a detailed description.

Topics

First hour, quick news

1. Brief descriptions of what Tiki things you've been up to, by anyone who wants to say
2. ...

put your topic (max. 5-10 minutes) into the list above

Second hour, longer topics

1. Progress report on Bootstrap color modes (prefers-color-theme, etc.) . Written summary is here: <https://themes.tiki.org/Status-of-Color-Modes-in-Tiki---April-23>.
2. How to make tiki faster again:
 1. share ideas about js script and CSS loading/splitting/joining problems as described in: https://dev.tiki.org/item8377-Improve-page-load-times-by-not-loading-unused-CSS-and-Javascript-e-g-elfinder-js-code_mirror-js-etc
 2. proposal for javascripts in settings: list all javascripts and add (discuss) options - block, on-demand, module, async, defer.
 3. 2 - 3 - 4 loading batches idea - essentials before dom, load later/async, load on-demand, do not load in any case.
 4. which of the mentioned options would be safe to assign by default to the following scripts:

Most interest: kanban (mostly not used), elfinder (very big), bootstrap essentials. How/When to load on-demand.

What could be a reason that in some cases non of those scripts are loaded in Firefox at all?
