Recording

Watch/listen to the recording of this meeting [here](#).

When

Our monthly meetings are the third Thursday of each month at 14h UTC

Thursday, June 15th, 2023 at 14:00:00 UTC (click to check time zone in your location)

Where

- <https://live.tiki.org>

What

The [members of the community](#) are **invited to fill the topic list** of the TRM.

As courtesy to other participant's, prepare a minimum your topic. Give context and details, prepare demos, screenshot, URL or reports in advance... anything that will allow better/faster understanding and getting into the topic. ☐

See [Roundtable Meetings](#) for a detailed description.

Topics

First hour, quick news

1. Tiki 26 Updates
 1. ~~Calendar revamp~~ (mostly done enough for branching, some fixes will continue)
 2. [Emoji Picker](#) - work continues
 3. [CSS loading changes in headerlib](#) issues need resolving
 4. [Qualified relations](#)
 5. ~~Last minute decision to switch to PHP8~~ Mostly solved
 6. <https://avan.tech/item92975-BLOCKER-Unexpected-Please-confirm-action-message-on-wiki-p-ages> (Emmanuel and Eutyche)
 7. Anything else?
2. How to help?
 - [Pre-dogfood servers for Tiki 26 release process](#) is ready for massive testing (Marc)
3. New commit process during the 26 release process: [Backport guidelines](#) (Jonny)
2. Tiki hidden gems: (Tiki feature, function or option that deserves more exposition and attention)
[External Wikis](#) is a very useful feature that allows to quickly create elegant link between wikis or sites. Handful of people are aware of such feature and many would have enjoyed it.
 - It is hard to find
 - The doc is succinct

- The inline help is confusing
 - (*See item8404*)
3. The Cypht Webmail project will become an organization and the Tiki community will increase its participation: <https://unencumberedbyfacts.com/2023/06/14/cypht-rebooted/> (Marc)
 4. mose created a new tool: <https://gitlab.com/tikiwiki/tiki-crawl> which is a first step for <https://dev.tiki.org/All-in-one-crawl-scrape-parse-tool>
 5. ...

put your topic (max. 5-10 minutes) into the list above

Second hour, longer topics

1. [Tiki installation on Yunohost](#). What Yunohost is for and and what it means for Tiki. (*Jyhem*)
Related links:
 - https://yunohost.org/#/index_en
 - https://github.com/Yunohost-Apps/tiki_ynh
2. Discuss where to commit process (backport, frontport, etc.?) during the 26 release process and after: [Backport guidelines](#)
3. [Qualified relations](#) before branching or wait for it to be more complete.

put your topic (max. 15 minutes) into the list above

Follow-Up

- ...

put your follow up action(s) when you're done into the list above

Sorry, I lost the network

ma

Marc Laporte (marclaporte)

00:07:22

@Marcellin: You and Jonny can work on it after the meeting

gu

Guest: Marcellin Wabo

00:08:59

[@Marc](#): Noted!

gu

Guest: eutyche ODIMBA

00:12:35

i think to do a revert is now a quickly solution

gu

Guest: Aris

00:38:07

ok

gu

Guest: Benoit Grégoire

00:40:47

Yes, "External URL Aliases" sounds pretty much like what it is now actually

lu

luciash d' being ☐ (luci)

00:41:35

It does not need to be external site per se. It can be also the same site prefix even or whatever.

ga

Gary Cunningham-Lee (chibaguy)

00:44:21

So could be called "URL aliases"?

lu

luciash d' being ☐ (luci)

00:45:03

Yes, sounds good to me @Gary

00:45:18

I wonder if can do even more things related to url... shop with product ID...

be
Bernard Sfez / Tiki Specialist (Bsfez)
00:45:32
"URL aliases" +1

lu
luciash d' being ☐ (luci)
00:47:14
You can use it for anything basically, e.g. trackers, you can create aliases like "item\$page" and use item:123 instead.

ga
Gary Cunningham-Lee (chibaguy)
00:48:11
So both URLs and IRLs — could it be "Link aliases"?

gu
Guest: Aris
00:48:12
Very interesting idea about trackers and aliases

be
Bernard Sfez / Tiki Specialist (Bsfez)
00:48:35
Thanks Luci... Great it really open ideas

ga
Gary Cunningham-Lee (chibaguy)
00:48:56
Or is URL aliases more accurate?

ma
Marc Laporte (marclaporte)
00:49:27
See the recording here: <https://dev.tiki.org/Email-as-a-first-class-citizen>

lu
luciash d' being ☐ (luci)
00:49:29
"URL aliases" better I think

gu
Guest: Benoit Grégoire
00:49:38
"URL aliases" +1

ga

YunoHost is an operating system aimed at making the administration of a Linux server incredibly simple. Oddly enough, YunoHost is also a Linux distribution, based on Debian Bullseye.

01:24:06

good.

lu

luciash d' being ☐ (luci)

01:24:27

Good work, Jean-Marc and co.

lu

luciash d' being ☐ (luci)

01:28:57

But few lines below you set it using console.php preferences:set ??? So it would work with that path too?

lu

luciash d' being ☐ (luci)

01:29:07

I guess

be

Bernard Sfez / Tiki Specialist (Bsfez)

01:31:21

I will leave in 10 to 15mn but...

je

Jean-Marc Libs (Jyhem)

01:32:01

yes, it would work with that path. But the "back to default" button would still be there...

ad

Adrien (adrien.maloba)

01:38:37

Sadly I have to go! I'll catch up with you guys on Matrix to see what the conclusion was, if these qualified relations must be there before branching or not. See you, thanks!

lu

luciash d' being ☐ (luci)

01:38:55

Bye roberto

lu

luciash d' being ☐ (luci)

01:40:41

I don't get it. Cannot that be already done with Item Link and Item List fields?

lu

luciash d' being ☐ (luci)

01:42:54

I meant you could have separate Tracker, where you could save items like Drummer, Guitarist, etc. and users could choose in another tracker (like e.g. People) from them and even add new items as relations?

ma

Marc Laporte (marclaporte)

01:43:58

<https://avan.tech/item10397-Tiki26-Describe-the-relation>

lu

luciash d' being ☐ (luci)

01:44:19

But it might be limited to set up that other tracker with musician types first by Admin, so this new feature would solve that I understand correctly?

lu

luciash d' being ☐ (luci)

01:44:41

Thanks Marc

lu

luciash d' being ☐ (luci)

01:47:00

Oh, it's not completely new feature. I even commented on it in 2017 it seems ☐

je

Jean-Marc Libs (Jyhem)

01:51:35

Is this using d3.js?

02:02:21
new features are no-go for older versions so that example is not ideal - better would be an enhancement example?
be

02:03:37
[]
lu
luciash d' being [] (luci)
02:06:03
I can imagine ENH on older version branch only when it is for a feature which was endangered and removed/revamped on master (or on the latest version), so it does not have to go there. But otherwise I would prefer doing it on master always first and then backport (when not frozen).
