

Source Control Management

Most organizations don't need Source Control. But for those that do, it would be good to have a solution. See also: [Integrated development environment](#)

For sure, we need something for source control, but Tiki already has many software development tools, like bug tracker, wiki, [Code Review](#), etc. To be discussed as to what should be done in Tiki or not. Ex:

- Continuous Integration

Options

Gitea

Phabricator
