Other sites where Tiki has ratings, relative to other projects.

WikiMatrix Statistics

http://www.wikimatrix.org/statistics.php

Alexa has a "Wiki Engines" category which tracks "most visited sites"

Freshmeat has a wiki category, sortable by "Popularity", "Rating", "Vitality" or "Last update"  
http://freshmeat.net/tags/wiki?sort=popularity

SourceForge recently added a wiki category, sortable by "Rank", "Activity", "Latest File" or number of "Downloads"  
http://sourceforge.net/softwaremap/?type_of_search=soft&fq[]=trove:651&sort=num_downloads_week&sortdir=desc&limit=25

As of 2008-10, not all wiki engine have been added/moved to the category yet. Also, the stats are only relevant for wiki engines hosted on Sourceforge.

Social Source Commons has "Wiki tools" "toolbox" sorted by popularity.  
http://socialsourcecommons.org/toolbox/show/1360?sort_by=popularity

Ohloh, where developers can add wiki engines to their "stack".  
https://www.openhub.net/tags/wiki

Some Tiki stats:  
Tiki Sourceforge stats, another Sourceforge etc.  
Tiki Freshmeat stats,

  ○ like Alexa, compete, etc

http://www.alexa.com/browse/general/?&CategoryID=1280166&mode=general&R=True&Start=1&SortBy=Popularity

Mailing lists  
Dev mailing list

[X]

Project size

  ● 100 000+ messages on the Mailing Lists, since the beginning of the project, which includes CVS-SVN commit messages.
  ● 1+ million lines of code
    ○ More than half is code coming from other projects. See Source Lines of Code
  ● 240+ code contributors
  ● Thousands of wiki pages
  ● Thousands of forum posts
Currently tiki.org has 20 000+ registered users and 300+ developers at this site.

Stats of Tiki

Stats of Tiki

Would be nice to have an evolution of Lines of Source Code. And also, evolution how many we maintain vs re-use. Ex: Zend Framework

svnplot

Suggestion by SEWilcon: http://code.google.com/p/svnplot/

• svnplot at stats.tiki.org
  • but the results are quite weird so perhaps we should test an upgrade and/or get StatSVN

statsvn

• Some stats for SVN activity :: looking for a volunteer to host stats server and maintain app

W3Techs

2011-10-25: W3Techs was made aware that the algorithm was missing many sites and they responded: "We have included your valuable remarks into our analyzer, which should somewhat improve the TikiWiki recognition."

BuiltWith

2011-10-26: BuiltWith was made aware that the algorithm was missing many sites and within the next month or so, the stats should be updated.
