Other sites where Tiki has ratings, relative to other projects.

WikiMatrix Statistics
http://www.wikimatrix.org/statistics.php

Alexa has a "Wiki Engines" category which tracks "most visited sites"
Freshmeat has a wiki category, sortable by "Popularity", "Rating", "Vitality" or "Last update". [http://freshmeat.net/tags/wiki?sort=popularity](http://freshmeat.net/tags/wiki?sort=popularity)

As of 2008-10, not all wiki engine have been added/moved to the category yet. Also, the stats are only relevant for wiki engines hosted on Sourceforge.

Social Source Commons has "Wiki tools" "toolbox" sorted by popularity. [http://socialsourcecommons.org/toolbox/show/1360?sort_by=popularity](http://socialsourcecommons.org/toolbox/show/1360?sort_by=popularity)

Ohloh, where developers can add wiki engines to their "stack". [https://www.ohloh.net/tags/wiki](https://www.ohloh.net/tags/wiki)

Some Tiki stats:
- [Tiki Sourceforge stats](#), another [Sourceforge](#) etc.
- [Tiki Freshmeat stats](#),

  - like Alexa, compete, etc
    - Alexa:

      - Compete:
        - [x]
      - Compete:
        - [x]

    - Use [Google Insights](#) to track search volume:
      - [x]

Investigate

Mailing lists
- Dev mailing list
  - [x]

Project size
- 100 000+ messages on the Mailing Lists, since the beginning of the project, which includes CVS-SVN commit messages.
- 1+ million lines of code
  - More than half is code coming from other projects. See [Source Lines of Code](#)
- 240+ code contributors
- Thousands of wiki pages
- Thousands of forum posts
Currently tiki.org has 20,000+ registered users and 300+ developers at this site.

Stats of Tiki commits

Would be nice to have an evolution of Lines of Source Code. And also, evolution how many we maintain vs re-use. Ex: Zend Framework

svnplot

Suggestion by SEWilcon: http://code.google.com/p/svnplot/

  • svnplot at stats.tiki.org
    ○ but the results are quite weird so perhaps we should test an upgrade and/or get StatSVN

statsvn

  • Some stats for SVN activity :: looking for a volunteer to host stats server and maintain app

W3Techs

2011-10-25: W3Techs was made aware that the algorithm was missing many sites and they responded: “We have included your valuable remarks into our analyzer, which should somewhat improve the TikiWiki recognition."

BuiltWith

2011-10-26: BuiltWith was made aware that the algorithm was missing many sites and within the next month or so, the stats should be updated.
