

Talk Page

Talk page

Talk page is the concept of having a parallel page for each wiki page to handle discussions about that page.

That can somewhat be done manually in Tiki (just create a page and link to it). However, it's more typical to use [Comments](#) at the bottom of the page, or to insert the notes in the page and hiding from some people and/or clearly indicating the nature of the text (ex.: non-official comment) using [PluginGroup](#), [PluginQuote](#), [PluginMouseOver](#), etc.
