TikiFestMontrealNov2008 Technical Group

Table of contents

Strand 1 - Technical

Some suggestions for this strand are:

- Using/improving webservices
- Using/improving profiles
- Multilingual (alain, Marta, lph)
- Improving the editing GUI
- Extending trackers
- Shopping carts
- Installation/upgrade script: 1h discussion to make better (like other CMS apps)
- Discussion on workspaces
- HTML in Tiki Syntax ? Where do we filter html input/where do we allow javascript ?
- Magic: do we keep it ? What needs to be done ?
- What goes on which of our websites

And maybe:

- improving the templates/css

Please add to this list if you want.
