L'Associació Vall del Corb, creada la primavera del 2000, és formada per un grup de prop de 300 socis i sòcies units per un territori, la Vall del Corb, aplegats per a fer dels pobles que la configuren llocs on la població hi romanguí, hi pugui viure i hi vingui a gaudir del seu entorn.

Entenem que la Vall del Corb és una unitat social, geogràfica, històrica i econòmica. Per això, els objectius de l'Associació són:

- dinamitzar els pobles de la vall, organitzant activitats diverses, o donant a conèixer les ja existents
- promoure l'estudi de la zona
- estimular les iniciatives que ajudin el seu desenvolupament
- dur a terme activitats que la donin a conèixer

Tiki Project Welcomes New Administrators

Author: Gary Cunningham-Lee - Published 08 Apr 2022 06:31 GMT-0000

Tiki Wiki CMS Groupware is an organic self-governing project that does things "the wiki way" and, in this spirit, when it's time to find people to join the group of project administrators, we draw from the community or active participants who can contribute time and effort to help with the guidance and direction of the project.

At this time, the [Admin Group](#) of the [Tiki Software Community Association](#) is pleased to announce the addition of two new members, Habiba Shahbaz and Roberto Kirschbaum. Habiba is bringing her unique skillset to keep the wheels of project administration turning smoothly, and Roberto has been actively contributing his coding skills, managing releases, and participating in community meetings. We are very pleased to make this announcement, and thanks again to the new admins for joining as we look forward to a great 2022.

Another administration change to announce is that Bilal Siddiq has resigned from the administrators group to devote more time to his other pursuits. We thank Bilal for his time in the group and wish him the best.

Tiki 24 LTS Released

Author: Gary Cunningham-Lee - Published 15 Mar 2022 11:08 GMT-0000

After several months of hard work, the latest long-term support version, Tiki 24, has been released. This version of Tiki Wiki CMS Groupware, which benefited from EvoluData's junior developer sponsorship program for a more coordinated approach to bug fixing, includes significant new features and numerous bug fixes and security enhancements. We are pleased to make Tiki 24.0 available at this time. Regular feature support will be provided for Tiki 24 via point releases until at least March 2024, and security updates until the end of the version's service life in March 2027. See the timeline on [Versions](#).
