

TouchGraphDemo

1. Running the TouchGraph WikiBrowser requires a Java Runtime Environment (JRE) with version number of at least 1.3.0 You can [get the latest JRE](#) (The JRE links are in the left most column.)
2. Download TGWB_102_TikiWiki.zip which is attached to this page.
3. Unzip TGWB_102_TikiWiki.zip in any directory
4. Windows: double click TikiWiki.bat
5. Linux: execute TikiWiki.sh

That's it!
