

UserPageDaveSanders

My name is Dave Sanders and I'm a "developer" on TikiWiki. "Developer" meaning that I haven't actually developed and submitted a patch yet, but I'm playing with the site, looking through the code etc. I also contribute by helping to organize all of the RFEs and Bugs, to help the real developers and streamline the process. It's neccessary work, not many want to do it 😊 and it helps you understand the pulse of the project.

When I'm not Tiki'ing, I'm either at work building online ASP applications for the Annuity and Insurance industry ([Finetre](#)) or I'm at home with the wife and three kids.

Things I've worked on here

- ReportBugs (the first very early version of the howto)
- Set up the initial scheme for bug categories and groups on SF.net.
