UserPageguyfr

I currently work for Touchtunes Music Digital Corp, the leading distributor of **Digital Jukebox** in the United States. I'm currently the **Software Configuration Manager**(i.e. Maintainer) of our code base, a beautifull (*cough*) mix of **C**,**Java**, **GTK/GLIB** and douzen of bash scripts.

I've started using Tiki as a replacement solution for our previous R&D intranet. My colleagues embraced this tool really quick. Now i'm trying to talk other departement to give tikiwiki a try as a "official intranet" solution....
