

UserPagehermione

um. hi. i'm hermione. no, i'm not a rabid harry potter fan. but i am too clever for my own good sometimes.

i'm trying to set up a portal news site. like slashdot, only with more user stuff and less emphasis on modding. tiki seems like it could be the answer. so i'm playing around a bit.

about me? i work with workflow. i graduated from cambridge this year with a degree in computer science, which i am currently wasting. one day i want to set up my own company and take over the world.

oh yeah, and the one thing i *really* hate is StudlyCaps. gah!
