

UserPagehalk

I am a heavy user of TikiWiki....

and I try to help testing future releases...

translating to Danish language...

and right now...

I try to get a grip of the source code...

I have worked for a long time(18+) in in the IT-Industry...

mostly as a consultant working with new technologies...

cost-benefit of implementing new IT systems...

culture changes...

object oriented analysis and design...

development methodologies... and environments... code reuse...

project management, IT architecture (J2EE, Web)...

IT strategy, Consulting, Sales...

etc.

I move to Sweden in the spring 2009...

and search opportunities there...

/Henrik 😊
